Indian Institute of Technology Jodhpur

Department of HSS

Concept Note on Role of HSS in Engineering curriculum and HSS Courses

॥ त्वं ज्ञानमयो विज्ञानमयोऽसि ॥

1. Introduction

The Department of Humanities and Social Sciences (HSS) plays a unique role in an Institute where the ethos of Science and Technology is predominant. Within the coordinates of the IIT system, the Department offers a unique scope to study and comprehend the critical role of technology within a socio-cultural context. With faculty members who specialize in diverse disciplines and students from a spectrum of backgrounds, the Department provides an enriching platform where technical education can be complemented with human and social understanding.

Furthermore, the Department, with its faculty from a wide spectrum of diverse disciplines, paves the way for learning and discussions on multiple issues ranging from the rigor of analysis to engagement with multiple cultures, individual struggles, political trends, dialogue and reasoning. Thus, the Department of HSS facilitates a well-rounded and expansive point of view amongst the student community. These young minds that come in contact with varied knowledge systems are likely to evolve into reflective and thinking individuals with refined sensibilities. Such a process is expected to enable them to appreciate life more creatively, effectively, and holistically and contribute in a positive way to the nation at large.

2. Objectives

The IIT system and fraternity was set up in order to create the scientific-technological sensibility that was necessary for a newly independent developing nation. It has never been about a mere production of technocrats. The humanities and social science disciplines offer IIT undergraduates a holistic and self-reflective education, making them suitable for a changing global education and work ecosystem where disciplinary boundaries perish and interdisciplinarity emerges as the new norm. To achieve that, the HSS education in the IITs introduces students to processes of knowledge production in the discipline and makes them reflect on the interconnectedness that exists between different disciplines. What we seek to create is an exciting body of new knowledge that will allow us to operate from unbiased –unconstrained – free thinking spaces.

3. Expected Graduate Attributes

A student who has completed HSS electives in the curriculum is expected to have the ability to:

a. Develop finer sensibilities, experience the nuances of creativity and the power of imagination
b. Appreciate and analyses modes of engagement with diverse aesthetic and cultural forms
c. Understand diversity of values, thought and accept differences.
d. Empathize with diverse aspects of human endeavor and to be sensitive to societal needs.

4. Learning Outcomes

A student, after having HSS education in the IIT system, is supposed to:

a. Identify and understand social issues and devise socio-technical solutions built on social awareness and informed imagination.
b. Become a pragmatic individual who can contribute in creating sustainable futures.
c. Gain awareness of rights as a citizen and location within the wider social context
d. Reflect critically on own disciplinary biases
e. Develop a sense of interdisciplinarity and acquaint herself with the various processes of knowledge production

5. Skillsets targeted

Creative Thinking, Empathy, Reflective Learning, Engaging with Society, Critical thinking, Logical Reasoning, Argumentation, Metacognitive Ability, Imagination, Ethical Sensibility, Scientific Thinking

6. Topic clouds and Mapping of Topic clouds with proposed courses

HSS Bouquet I: Literature

Objectives: The courses at this level will

a. Expose students to a global canvas in literature.
b. Inculcate an appreciation for diverse literary works including those from cultures outside the Anglophone world.

Learning Outcomes: On completing courses at this level, students are expected to have the ability to:

a. Develop a sensibility for literature as an aesthetic form.
b. Critically analyze and locate literary texts within cultural contexts.

HSS Bouquet II: Sociology, History, Political Science

Objectives: The courses at this level will

a. Educate students about (global) society, history, politics and culture.
b. Sensitize students on issues of gender and social stratification.
c. Raise awareness on impact of science and technology on society.

Learning Outcomes: On completing courses at this level, students are expected to have the ability to:

a. Critically conceptualize society, culture and politics.
b. Understand disciplinary biases in scientism, technology and engineering.

HSS Bouquet III: Economics, Management, Public Health

Objectives: The courses at this level will

a. Provide the basic foundation of Economics for understanding the interplay of demand and supply.
b. To use simple economic theories to analyse and understand decision making processes by governments, organizations and individuals.
c. Provide understanding of India's health care system with special focus on health economics and financing.

Learning Outcomes: On completing courses at this level, students are expected to have the ability to:

a. Understand the functioning of the Economy: its structure and components.
b. Understand the economics behind the common phenomena like inflation, unemployment, GDP, recession.
c. Understand the health system and its various components in India.

HSS Bouquet IV: Philosophy, Policy, Governance

Objectives: The courses at this level will

a. Make students be sensitive to dilemmas in professional, personal and social life.
b. Develop logical and critical thinking.
c. Make students aware of the dynamics of policy deliberation and implementation.

Learning Outcomes: On completing courses at this level, students are expected to have the ability to:

a. Develop ethical and aesthetic sensibility.
b. Nurture finer fibers that bind social harmony and integrity
c. Ability to imagine and propose structural changes that are conducive to sustainable development.

Course list in HSS Bouquets

SN	Bouquet I	Bouquet II	Bouquet III	Bouquet IV
1.	Short stories from around the world	Introduction to sociology	Microeconomics 1 (AIDE-CMCE)	Introduction to Philosophy
2.	Regional literature in translation	Digital Society	Microeconomics 2 (AIDE-CMCE)	Fundamentals of logic
3.	Creative writing	Urban Sociology	Health Economics	Critical Thinking
4.	Postcolonial Fiction	Indian Society: A sociological introduction	Industrial Organization	Cognitive Semantics
5.	Short Fiction from India	Youth studies	Health and Development	Philosophical Problems

6.	Science Fiction	Law and Society	Indian Economic Development and Policy	Introduction to Indian Philosophy
7.	Introduction to Theatre	Sociology of Work and Industry	Political and Institutional Economics of Development	Theories of justice
8.	Short Fictions from South Asian Diaspora	Development and Environment	Foundations and Finance	Gandhian Thought
9.	Classic Detective Fiction	Social Stratification	Individual and Strategic Decision Making (AIDE-CMCE)	Role of Technology in Development
10.			Social and Economics Networks (AIDE-CMCE)	Disasters, Risk Reduction, and Management
11.			Behavioral Economics and Decision Theory (AIDE-CMCE)	Political and Cultural Ecology

Table 1. Topics and Mapping of Topic with Courses

Area	**Topics**	**Course [Humanities Electives (IH)/Open Electives (OE)/Specialization Core/Electives (SC/SE)]**
Literature	Short story, short fiction, world literature, transnational literature, twentieth-century, Anglophone writing, modernism, magic realism	Short Stories from around the World (IH)
	Regional literatures in translation, regional literature, comparative analysis, translation, transliteration, literary cultures, multilingual literary cultures	Regional Literature in Translation (IH)
	Creative imagination, writing, creativity, genres of writing, writing workshop, composition, writing craft, plot, scene, dialogue, memoir, screenplay, short fiction, writing prompts, creative nonfiction, publishing	Creative Writing (IH)
	British Colonialism, Indian writers in English, Indian novels, short stories by Indian writers, Indian diaspora fiction, Victorian era, globalization, Indian national identity, regional contestations, autobiographical novel, historical novel, Indian fantasy fiction, Independence and Partition, caste, identity politics, subaltern fiction, writing from the margins, postcolonial theories	Postcolonial Fiction (IH)
	Short fiction, Creative imagination, South Asia, Brevity, Flash fiction, fiction, plot, scene, narrative, literary and popular fiction, genre fiction	Short Fiction from India (IH)
	Science fiction, dystopia, apocalyptic fiction, world wars, time travel, man vs. machine, humanity and technology, progressivism and Science fiction, alien life, metaphorical thinking	Science Fiction (IH)

Area	Topics	Course [Humanities Electives (IH)/Open Electives (OE)/Specialization Core/Electives (SC/SE)]
	Theatre/drama, text/performance, Aristotelian theatre, Brechtian/epic theatre, theatre of the absurd, biomechanics, poor theatre, theatre of the oppressed, third theatre, Indian theatre histories	Introduction to Theatre (IH)
	South Asian diasporic literature, immigration of South Asians, cultural identity, notions of home and belonging, model minority, gender and sexual identity, experiences of dislocation and acculturation, queer diaspora.	Short Fictions from South Asian Diaspora (IH)
	War literatures, Speculative fiction, Novel of Crime, Thrillers, Intrigue, Spy fiction, Espionage, War literatures.	Classic Detective Fiction (IH)
	Popular literature, popular culture, from text to film, comparative analysis, literary genres, genre analysis, classical literature	Popular classics (OE)
	Basic aspects of film aesthetics, film and other arts, film criticism and appreciation, film history (early cinema, classical Hollywood, Italian Neorealism, French New Wave), introduction to film theory (classical and post-classical), Third Cinema, Indian cinemas, digital cinema	Introduction to Film Studies (OE)
	Dalit studies, Ambedkar's writings, Gandhi-Ambedkar debate, concept of untouchability and its philosophical explorations (Aniket Jaaware and others), anti-caste movements in North, West and South India, dalit identity and politics, dalit literatures from Maharashtra (Namdeo Dhasal, Sharankumar Limbale) and South India	Dalit Movement and Literature (OE)
	Introducing Emergency, historical trajectory, literature review, cinema, cine-politics and cultural politics, censorship, state sponsorship and film economy, Indian cinemas in the 1970s, globalization of the dictatorial in the 1970s, digital remembering	Cine-politics under the National emergency (OE)
	Literary history, literary terms and genres, literary cultures in history, impact of technology on literature, history of publishing, linguistic analysis, discourse analysis, semantics, South Asian literatures, oral and print cultures in literature	Perspectives in Language and Literary Studies (DH) (OE)
	Introduction to the world of publishing with both its practical and creative aspects. The course also prepares students for the different kinds of opportunities they could explore after the conclusion of their degrees, and the publishing industry, as an emerging field, could be one such avenue.	Introduction to Editing and Publishing (OE)

Area	Topics	Course [Humanities Electives (IH)/Open Electives (OE)/Specialization Core/Electives (SC/SE)]
	Film history and historiography, colonial history, national history, ideological history, institutional history, biographical-historical, economic history, exhibitional history, global history, film anthropology/ethnography, genre, corporeal and spatial history	Indian Cinemas: Many Histories (OE)
	Introduction to literatures from the eight ecological-rich states in India's Northeast by weaving a narrative of political fragility, oral tradition, and collective memories while dispelling the misconceptions about this heterogeneous region	Introduction to Literatures from India's Northeast (OE)
	Introduction to visual arts, Art history and major art movements in Europe (from classical to modern), Histories of ancient and medieval Indian art, Renaissance perspective and Indian resistance, Major Indian artists and art groups, visual art, experimental cinema, installation art, new modes of exhibition	Introduction to Contemporary Arts (OE)
	Introduction to performance, performance theories, performance history through the ages, classical drama, Renaissance drama, dramaturgy, playgoing cultures, theatre movements and modernism, acting styles, absurd theatre, theatre-cinema interface, classical Indian theatre, Indian theatre in colonial and postcolonial times	Introduction to Performance Studies (OE)
	Post-Independence theatre and institutional histories, urban/folk, theatre in the long 1960s, major playwrights and select plays, production histories, film adaptation of theatrical texts, political theatre, third theatre, theatre after globalization	Modern Indian Theatre (OE)
	Introducing different genre of Asian American literature, close textual reading and conversation.	Asian American Literature (OE)
	Introducing world literature, World literature and its complexities, Cinema and the translation, Contemporary categories	World Literature and Global Cinema (OE)
Sociology, History, Political Science	Sociological Theories and Perspectives; Social Structures, Social Institutions (Family, Marriage, Education, Religion, Economy); Social Stratifications (Ethnicity, Race, Class, Caste, Gender); Social Inequalities; Social processes (Migration and Mobilities); Community, Globalisation and Environment; People, Places, and Technology	Introduction to Sociology (IH)

Area	Topics	Course [Humanities Electives (IH)/Open Electives (OE)/Specialization Core/Electives (SC/SE)]
	Digital components of a connected society; new forms of power; Data as sociomaterial objects; Digital identities; Urban informatics and sociological imagination; Digital healthcare, mobility, Digital heritage; Networks and cultural imaginary; Information capital, information management	Digital Society (IH)
	History of Urbanization, Concept of urbanization, Re-settlement colonies, Urban poor, urban infrastructures, mobilities, Urban markets, Riots and the city, case study of New Delhi and its importance in urban studies	Urban Sociology (IH)
	Caste, Class, social stratification, Indian economy and polity, traditional systems of administration, Tribes, Green revolution, Studies of urban areas, Rural sociology, Marriage, Family and Kinship, Mobility in cities	Indian Society: A sociological introduction (IH)
	Youth movements, relationships, youth subcultures, youth and technology, social media, identity	Youth studies (IH)
	Sociology of Law, Legal Language, Morality, Justice, Social Deviance, Multiple legalities	Law and Society (IH)
	Industry, work, sociology of work, trade unions, labor, new work, technology and new forms of work and labor, labor rights today, labor and technology	Sociology of Work and Industry (IH)
	Natural Resource Management, Gender, Policy, Governance, Law, Environment Movements, Development Discourses	Development and Environment (IH)
	Class analysis and class structures, and transformations, Theories on caste with empirical focus on India, Stratification and Gender, Racem ethnicity and stratification	Social Stratification (IH)
	Classical Sociological thinkers, Structural Functionalism, Conflict Theories, Modernity and postmodernism, Globalization, Cultural Theory, Materialism, Theories of Consumption	Globalization and culture (OE)
	Science and Technology studies, Ethnography of a laboratory, social construction of reality, social construction of nature, Discrimination in science, Actor Network Theory, Anthropology of non-humans, ecological understanding of world, Science and technology is colonial India, Science and Governance in India, History and Philosophy of Science and Technology, Technology and Art	Sociology of Science and Technology (OE)
	Concept of culture, cultural studies: theories and debates, popular culture, identity, visual and audio-visual cultures, heritage and conservation, intangible heritage, fine arts, music, literary arts, oral traditions	Culture, Art and Heritage (OE)

Area	Topics	Course [Humanities Electives (IH)/Open Electives (OE)/Specialization Core/Electives (SC/SE)]
	Gender as social construction; Gender in Colonial History; Gender across geo-social scales; Gender and Migration; Feminisms; Gender, Science, and Technology (Household technologies; Medical technologies; Communication technologies); Video Games; Imagining and Representing Gender; Gender in Literature and Culture; Postcolonial Studies; Normativity, Subversions, and Queer Studies; Global Gender Politics	Gender and Society (OE)
Economics, Management, Public Health	Preferences, utility theory, cardinal vs optimal approaches, utility maximization problem, cardinal vs ordinal approaches, expenditure minimization, demand analysis, integrability and recoverability, weak axiom of revealed preference, producer theory, welfare theorems, market structures, general equilibrium: introductory.	Microeconomics 1 (AIDE-CMCE) (IH)
	Game theory: overview, information economics, auctions and mechanism design problems, general equilibrium theory	Microeconomics 2 (AIDE-CMCE) (IH)
	Economics of health; Microeconomic and macroeconomic theory of health sector; Understanding health systems; Health insurance schemes.	Health Economics (IH)
	Introduction to concepts for economic analysis; market structures and strategic techniques; price discrimination; static and dynamic competition; product differentiation; entry, accommodation and exit.	Industrial Organization (IH)
	Concepts of health and development; Wellbeing of the world; Inequalities in health, and social determinants of health; Impact of globalization on health; Health, development and challenges in India.	Health and Development (IH)
	Exploration of current and evolving policy debates in the backdrop of issues pertaining to economic development of India.	Indian Economic Development and Policy (IH)
	Importance and role of institutions, politics and society in economic growth and development, Impact of intricately-related institutional and political aspects on decisions and actions, society and the economy.	Political and Institutional Economics of Development (IH)
	Basics of Money, Banking and Financial Markets, basics of personal finance, working of finance	Foundations of Finance (IH)
	Introduction to strategic games, strict and weak domination, rationalizability and iterated elimination, Nash equilibrium, correlated equilibrium, Bayesian games, extensive form games, games with imperfect	Individual and Strategic Decision Making (AIDE-CMCE) (IH)

Area	Topics	Course [Humanities Electives (IH)/Open Electives (OE)/Specialization Core/Electives (SC/SE)]
	information, backward induction, repeated games, Folk theorems.	
	Introduction to networks, representing and measuring networks, random networks, network games, economic applications	Social and Economic Networks (AIDE-CMCE) (IH)
	Rational choice, important axioms in choice theory and their relevance in characterizing choice, decision theory models with boundedly rational agents, stochastic choice models, decision making under uncertainty, applications of decision theory in AI.	Behavioral Economics and Decision Theory (AIDE-CMCE) (IH)
	Principles, measurements, and diseases burden; Concepts of global health, and its relevance; Determinants of global health and policy; Medical technologies; Cross-cutting global health themes; Global health institutions.	Global Health (OE)
	Making health policy; Evolution of India's Health policy; Understanding health system; Healthcare financing.	Health Policy, Systems and Financing (OE)
	Making Health Policy, Evolution of India's Health Policy, Understanding Health System, Healthcare financing, National Level Secondary Health Data Sets	Healthy Policy, Systems and Financing (OE)
Philosophy, Policy, Governance	Wisdom, Insight, Foresight, Intellectual Traditions, Western Philosophy, Eastern Schools of Thought, Contemporary Philosophy, Major Philosophical Issues	Introduction to Philosophy (IH)
	Truth and Validity, Reasoning, Propositional Logic, Predicate Logic, Aristotelian Logic,	Fundamentals of logic (IH)
	Informal fallacies, cognitive biases, Cognitive Unconscious, Dual Processing	Critical Thinking (IH)
	Language, Metaphors, Meaning and Conceptual Structure	Cognitive semantics (IH),
	Epistemological problems, Metaphysical Problems, Theodicy, Ethical Dilemmas, Meaning of Life	Philosophical Problems (IH)
	Indian Intellectual Tradition, Salient Features of Indian Philosophy, Major Schools of Thought, Classical and Contemporary Thinkers	Introduction to Indian Philosophy (IH)
	Concepts of Justice, Distributive Justice, Procedural Fairness, Global Justice, Intergenerational Justice, Restorative Justice, Grounds of Justice	Theories of justice (IH)
	Significance of Gandhian Thought; Major Works and Ideas of Gandhi; Gandhian Concept of Peace and Nonviolence; The Triad; Eleven Virtues; Idea of Progress and Development; Political Thought; Politics, Law and Morality; Contemporary Relevance	Gandhian Thought (IH)

Area	Topics	Course [Humanities Electives (IH)/Open Electives (OE)/Specialization Core/Electives (SC/SE)]
	History of development, Concept of Development, Planning in India, Technology as key for India's development, Low carbon economy	Role of technology in development (IH)
	Natural Disasters and Pandemics, Natural Resource Management, build back better, vulnerability, foresight, risk, resilience livelihoods, National-state policies, geo-politics, international aid, CSOs, GIS, emerging technologies	Disasters, Risk Reduction, and Management (IH)
	Social construction of nature, natural resource management and conservation, development, degradation and marginalization, neoliberalism and environmental governance	Political and Cultural Ecology (IH)
	Development of Intellectual Traditions; History of Sciences; Critical Thinking; Analytic Tradition; Paradigmatic Shifts; Scientific Temper; Limits of Scientific Explanations	History and Philosophy of Science (OE)
	The idea of sustainability; emergence and scope of sustainability science; basic principles of sustainable development; seminal works, documents and declarations; technological imperatives and social imperatives; sciences, values and value of sciences; plausible applications of technologies and sustainability concerns; energy, society, and environment; global pollution and health risks; susceptibility assessment; evolutionary roots of environmental problems; Social benefits and technological risks; perceiving and justifying risks, cost-benefit analysis and right based approach; uncertainty assessment and precautionary principle; sustainable development goals	Foundations of Sustainability (OE)
	Natural Resource Management, Food Security, Agriculture, Migration, Environment, health, Disasters	Climate Change and Society (OE)
	Natural Resource Management, Conflict, Livelihoods, Migration, Agriculture, Emerging Technologies, pollution, geo-politics, energy, cost-benefit, SDGs	Politics of water governance (OE)
Other	The nature of beauty and art; Platonic, Aritotelian, and Kantian concepts of beauty; aesthetic experience and judgment; the sublime; pleasure; existentialist perspectives; the genius and creativity; freedom and creative expressions; spectator's vantage point; feminist perspectives; the body; postmodern art; aesthetics of design; factors in design; industrial culture and design of products	Aesthetics (OE)
	Bioethical problems, professional dilemmas, animal and biosphere	Bioethics (OE)

Area	Topics	Course [Humanities Electives (IH)/Open Electives (OE)/Specialization Core/Electives (SC/SE)]
	Theories of consciousness, Science and philosophy of consciousness, altered states of consciousness, self and free will	Consciousness (OE)
	Introduction to emotion, intelligence, learning, memory, forgetting, personality, self, mastery, group behavior, stereotype, prejudices, attribution	Principles of Psychology (OE)
	Leadership basics, leader and follower interaction, gender and leadership issues, power and leadership connection, sources of power, power and unethical behavior, development of leadership qualities	Basics of Leadership (OE)
	Experiential learning-based discussion on soft skill like, self-awareness, empathy, emotional intelligence and regulation, unhelpful thinking styles, assertiveness, positive communication, delegation and group management	Life and Professional Skill Development (OE)
	Concepts and issues related to happiness and flourishing, well-being, positive emotion, mindfulness and flow, character strength and virtues	Positive Psychology and Wellbeing (OE)
	Consumption, markets, consumer society, commodity culture, consumption and class, material culture, overconsumption, consumer citizenship, global consumption, commodity flows	Consumer Culture and Commodities (OE)
	History of Civilizations and role of technology; Narratives of Progress; Social Construction of Technology - Colonial Technology; Diffusion and transfer of technology; Rise of the Internet and Digital Societies; Basics of archaeology (concept, methods, practices)	Civilizations, Cultures, and Technologies (DH) (OE)
	Visual Cultures; Images as Performative Space; Digital media and Global Image; Images, Power, and Resistance; Netnography / Digital Ethnography	Image, Imaginations, and Digital Cultures (DH) (OE)
	Emerging contours of Digital Humanities, Data and Knowledge Representation, Digital Archives	Fundamentals of Digital Humanities (DH) (OE)
	Introduction to New Media, its theories and histories, its social, political and cultural implications; public domain and digital commons, network society, online streaming and authorship debates, piracy and IP rights; media lab as research space; New Media and Indian/global politics	New Media Studies (DH) (OE)
	End of celluloid, post-cinema, digital cinema and durational principles, slow cinema, emerging domains of exhibition and spectatorship, digital film archives and databases, streaming platforms and authorship debates, digital restoration and preservation, experimental cinema-visual art alliance in the days of the digital	Digital Cinema (DH) (OE)

Area	Topics	Course [Humanities Electives (IH)/Open Electives (OE)/Specialization Core/Electives (SC/SE)]
	Introduction to the field of network cultures that revolves around the interaction between new forms of networked media technologies, its users, and the developing discourses	Network Cultures
	Examine the societal structures and expectations through which the gendered individual emerges as an integrated physiological, psychological, and socio-political being while locating how the postcolonial nation state and masculine behaviours intersect in the Global South through in-depth case studies and analysis of policy reports as well as cultural artifacts related to current environments, health, family, relationships, and aging.	Masculinities in/and the Global South
	Exploration of "Energy humanities" as a rapidly emerging field of scholarship that overcomes traditional boundaries between the humanities and natural sciences and between academic and applied research; highlighting the essential contributions, insights and methods that the humanities can make to areas of study and analysis that were once limited and siloed within the natural sciences: with special focus on the self-reflexive relationship between energy, rationality modernity	Energy Humanities
	Psychological theories of intelligence, Social-Emotional Intelligence, Measuring intelligence, different basis of intelligence	Theories of Intelligence (SOI) (OE)
	Study of advanced mental processes, such as organization of knowledge, reasoning, decision-making, language, problem solving, emotion etc.	Advance Cognitive Processes (SOI) (OE)
	Modern human-machine systems, knowledge base of engineering Psychology, human factor and engineering Psychology	Engineering Psychology (OE)
	Cognitive revolution, object perception and recognition, mental processes related to intelligence, memory and concept formation, higher mental process.	Cognitive Psychology (OE)
	Basic of cognitive neuroscience, behavioral measures of cognition, neural basis of mental process	Introduction to Cognitive Neuroscience (OE)
	The culture concept, culture industry, media and culture, culture in the digital age, globalization, mass culture, popular culture, visual and material culture, cultural preservation	Introduction to Cultural Studies
	Network Concepts, Graph, Connectivity, Software tools, NetworkX, Pajek	Analysis of Social Media Networks (DH) (OE)
	Digital Environment, Application in Teaching, Advertising, Training, Immersive Environment	Digital Storytelling (DH) (OE)

Area	Topics	Course [Humanities Electives (IH)/Open Electives (OE)/Specialization Core/Electives (SC/SE)]
	Anthropomorphism, Multimodal Interfaces, Cognitive aspects, Qualitative and Quantitative Evaluation.	Human Factors in Interaction Design (DH) (OE)

*** Course in HSS I-IV is available as an open elective also.**

7. Summary of Institute wide bouquet of Humanities Courses (Humanities I-4)

				Project I (3 credits, 600 level, 0-0-6, Elective)	Methodology workshop, selection of topics and areas, discussion sessions, final submission

Minor Program (Performing and Creative Arts)

Philosophy: The minor program on Performing and Creative Arts introduces students to theatre and performance, classical music, visual and audio-visual art practices (photography, film, installation) in order to explore the creative potential that the students may have and also to engage actively with Indian traditions in these domains. It is also interested in nurturing and developing the aesthetic sensibilities of the students that may help them in sharpening their skills for appreciating art and also in finding alternative career options.

Innovative Components: Some of the courses will have tutorials and practical sessions, workshops etc. and resource persons from various art and culture industries will be invited for the latter. There will be interactive sessions between resource persons and students. By the end of the program, there will be two elective project courses and students will be allowed to choose any of the three areas (visual arts, theatre and performance, classical music) for their respective projects.

Objectives

a. Nurturing and developing the aesthetic sensibilities of students
b. Exploring the creative potential of students
c. Encouraging students in exploring alternative career options
d. Introducing students to Indian traditions in the spheres of art

Learning Outcomes: At the completion of this minor, students are expected to have the ability to:

a. Have a basic grasp over performance and art histories/theories in India and abroad
b. Develop familiarity with modern/contemporary and traditional/classical art forms
c. Develop acquaintance with Indian art practices and traditions
d. Develop adequate aesthetic sensibilities to appreciate art
e. Find suitable methods for indulging in artistic practices of their choice

10. Detailed Course Content
of
Institute Level Humanities Bouquets

Institute vide Core Courses:

Title	**Communication Skill I**	Number	HSN 1010
Department	HSS	L-T-P [C]	0-0-1 [1]
Offered for	UG	Type	Compulsory
Prerequisite	None		

Objectives

The Instructor will:

1. Facilitate students to gain language competence in order to communicate effectively in a spectrum of contexts.
2. Focus on the two basic skills of language learning, namely: Listening and Reading
3. Train the student to employ the above skills in both personal and professional settings

Learning Outcomes

The students are expected to have the ability to:

1. Distinguish between hearing and listening, and to understand *listening* as a skill of critical significance.
2. Engage effectively in classroom situations and also with various texts, with useful reading strategies
3. Integrate classroom learning into an everyday communicative activity, thus making the learning both reflective and experiential.

Listening: Barriers to Listening, Active Listening, Listening and Speaking, Listening and Receiving, Listening and Understanding, Listening and Responding, Listening and Remembering, Listening and Paraphrasing, Listening and Reflecting, Listening to Pre-recorded audiovisual aids, Listening to and comprehending audio-visual media including films, radio programs, academic and/or public speeches.

Reading: Introduction and application of reading techniques, Comprehension, Types of reading including Scanning, Skimming, Critical Reading and Speed Reading, exploration of academic/journalistic/creative texts through various reading strategies.

Laboratory Sessions: Will include individual and group activities and hands on experiential learning modules

1) Workshop Session on Listening
2) Workshop on Reading, Review and Critical Analysis
   (i) Film Screening and Discussion
   (ii) Reading Books, Newspaper Articles, Journals

Total – 21 hours

Textbook

All reading material for the course will enhance both creative and critical thinking and will include the repertoire-newspaper articles, famous speeches, biographies, passages /narratives from science and technology, fiction, nonfiction and film, word games and puzzles and will be compiled by the instructors and shared with the student.

Title	**Communication Skill (II)**	Number	HSN 1020
Department	HSS	L-T-P [C]	0-0-1 [1]
Offered for	UG	Type	Compulsory
Prerequisite	None		

Objectives

The Instructor will:

1. Facilitate students to gain language competence in order to communicate effectively in a spectrum of contexts.
2. Focus on the two basic skills of language learning, namely: Speaking and Writing.
3. Train the student to employ the above skills in both personal and professional settings

Learning Outcomes

The students are expected to have the ability to:

1. Speak more efficiently and explore the act of writing as an active process.
2. Articulate with clarity and use better language, well-equipped for specific situations.
3. Integrate classroom learning into an everyday communicative activity, thus making the learning both reflective and experiential.

Speaking: Modes of Communication - Formal and Informal, Verbal and Non-verbal Communication, Group Discussions, Mock Personal Interviews, Power point presentations (academic and professional/business), Body Language, Basic Phonetics/Pronunciation, and Telephone Etiquette.

Writing: Paragraph Writing, Writing an Email, Note Making, Report Writing, Letter Writing, Reviewing articles, Structuring academic/professional writing

Grammar: Identifying Common Errors in English, Use of Articles, Use of Prepositions, Tenses, Spellings, Filling in Work Sheets

Laboratory Sessions: Will include individual and group activities and hands on experiential learning modules

1) Practice Workshop on Speaking (Group Discussion, Personal Interview)
2) Writing Workshop (Essay, Creative Nonfiction/Advertising, Storyboard, Journal Writing, Letter & Email Writing)
3) Field Visit and Workshop (Photo Essay, Report Writing)

Total – 21 hours

Textbook

All reading material for the course will enhance both creative and critical thinking and will include the repertoire-newspaper articles, famous speeches, biographies, passages /narratives from science and technology, fiction, nonfiction and film, word games and puzzles and will be compiled by the instructors and shared with the student.

HSS-I Literature

Title	**Short stories from around the World**	Number	HSL2xx0
Department	HSS	L-T-P [C]	3-0-0 [3]
Offered for	UG	Type	Elective
Prerequisite	None		

Objectives:

The Instructor will:

1. Expose the students to the wide array of short fiction as a literary genre from around the world.
2. Facilitate the student to understand and engage with short fiction translated into English from diverse nationalities, cultures and contexts.
3. Engage the students both critically and creatively in order to understand human conditions of the past and present in the context of these creations.

Learning Outcomes:

The students are expected to have the ability to:

1. Develop interpretative skills and appreciate nuanced literary sensibilities of world literatures.
2. Understand and engage with world literatures, societies, cultures, histories and politics.
3. Reflect on the significance of these plural conversations from around the world within the larger framework of literary narratives.

Contents

Introducing the genre: History, The rise and role of Fiction, Literary Traditions, Identities and Cultural trajectories (8 lectures)

Elements of Fiction: Literary Terms, Plot, Characters, Setting, Narrative Techniques, Dialogues, Conflicts, Point of View, Catharsis, Themes, Structure and Analysis (10 Lectures)

Title	**Introduction to Theatre**	Number	HSL2xx0
Department	HSS	L-T-P [C]	3-0-0 [3]
Offered for	UG	Type	Elective
Prerequisite	None		

Objectives

The instructor will:

1. Help students to become familiar with some of the basic tenets of drama as play-text and as a distinctive performance form
2. Help students to develop acquaintance with some of the most significant performance theories and classical, folk and modernist practices in ancient, medieval and modern times
3. Make students enable to trace the trajectory of these performance forms through Indian and European histories

Learning Outcomes

The students are expected to have the ability to:

1. Map the trajectory of dramatic forms in Indian and international histories
2. Explore the intricacies of play-texts and their transformation into performative texts
3. Develop acquaintance with theories of performance that may help them in making meaning of performance forms and texts

Contents

Introducing theatre: Differences between dramatic text and performance, theatre and its inclusivity (performance space, spectator, mise-en-scéne), theatre's exclusivity as a performance form, differences between theatre and cinema (5 lectures)

Dramatic/Aristotelian Theatre: Aristotelian theatre and its characteristics, tragedy and epic, excerpts from Greek tragedies (preferably The Theban plays of Sophocles), the three unities, verisimilitude, realist/method acting á la Stanislavksi (7 lectures)

Brechtian/Epic Theatre: Brecht and his theatre, epic theatre and its differences with dramatic theatre, alienation effect, selections from Brecht's plays (*The Good Woman of Setzuan*/*The Caucasian Chalk Circle*/*Mother Courage and Her Children*), political theatre (8 lectures)

Other Theatres: Basic introduction to other non-realist theatres/modes of performance such as absurd drama, Meyerhold's Biomechanics, Artaudian theatre, Grotwoski and his poor theatre, Augusto Boal and his theatre of the oppressed, Badal Sircar and his third theatre etc. (10 lectures)

Indian theatre histories: Classical theatre, Bharatamuni's *Natyashastra*, Sanskrit theatre, indigenous and folk theatre as traditions and living performance forms, theatre of roots, modern Indian theatre in colonial and postcolonial times (12 lectures)

Textbooks

1. Aristotle, (Longman Study Edition, 2006), *Poetics*, edited by Amlan Dasgupta, Pearson.

The instructor will:

1. Introduce students to the literary works of some well-known authors of the South Asian diaspora.
2. Discuss works by diasporic authors situated in places as diverse as Malaysia, Singapore, Britain, South Africa, the Middle East, the U.S., Canada, the Fiji Islands, and the Caribbean.
3. Focus on the global dispersal of people from India, Bangladesh, Sri Lanka, and Pakistan to uncover the changing historical, political, socioeconomic, and cultural contexts of South Asian immigration, from the nineteenth century onwards.
4. Discuss issues of transnational cultural flows and long-distance nationalism to interrogate constructs such as 'nation' and 'nationalism' in the context of the South Asian diaspora.

Learning Outcomes:

The students will be able to:

1. Understand how diasporans configure their notions of home, cultural identity and belonging by focusing on the experiences of dislocation, relocation, acculturation and marginalization as explored and addressed in these writers' works.
2. Develop an awareness of the relationship between these literary texts and their historical, political and cultural contexts to gain an insight into the complex, traumatic and fragmented history of South Asia.
3. Notice how postcolonial migration has radically reformulated and redefined earlier dynamics of migration, creating new relations between cultures of origin and adoption.

Contents:

Introducing the genre: Brief history of South Asian immigration, Distinguish between South Asian immigrants migrating to settler colonial societies of the US, Canada, Australia, New Zealand, South Africa, and the rest of the world, The rise of South Asian diasporic literature, Stereotyping as "model minority," Dual cultural identity, Exclusionary immigration laws, Discussion on the concept of queer diaspora to examine how diasporic experiences produces unconventional forms of sexuality and gender identity (7 lectures)

Title	**Classic Detective Fiction**	Number	HSL2xx0
Department	HSS	L-T-P [C]	3-0-0 [3]
Offered for	UG	Type	Elective
Prerequisite	None		

Objectives:

The instructor will:

1. Explore the key structural, thematic and contextual elements of a selection of English and translated detective fiction texts.
2. Provide students with a historical overview of classic detective fiction beginning with Edgar Allan Poe, the earliest writer of detective fiction, to the most acclaimed writers of the twentieth century.
3. Introduce students to literary techniques and devices, including the development of point of view, characterization, plot resolution, closure, setting, and dominant ideology, that authors of detective fiction use to foster the reader's experience of mystery and suspense.
4. Through a selection of short detective fictions help students investigate the spatio-temporal /cultural anxieties of the 20th century zeitgeist.

Learning Outcomes:

The students will be able to:

1. Detect how detective fiction about crime, intrigue, and murder reflects the values, concerns, and tensions of the society to which the author belongs.
2. Acquire knowledge of the more significant debates surrounding the context of crime, methods of surveillance, development of forensics, and administration of justice.
3. Identify intersections between literary representations of crime, and broader cultural discourses, such as postcolonialism, feminism, racism and gothicism.
4. Understand how women writers of detective fiction use its literary medium as a tool for shaping social attitudes and challenging gender roles.
5. Examine the psychological implications of detective fiction on readers and thereby judge its literary merit.

Contents:

Introducing the genre: Looking at detective fiction as a body of literature, defining terms such as 'mystery' and 'suspense,' history and evolution of detective fiction. (2 lectures)

Close Textual Readings and Conversations: Edgar Allan Poe (5 Lectures), Arthur Conan Doyle (5 Lectures), Agatha Christie (5 Lectures), Dorothy L. Sayers (5 Lectures), Anna Katharine Green (5 Lectures), G. K. Chesterton (5 Lectures), Satyajit Ray (5 Lectures), Saradindu Bandyopadhyay (5 Lectures)

Textbooks:

1. *The Complete Sherlock Holmes*, Gramercy Books.
2. *The World's Greatest Detective Stories*, Embassy Books.
3. *Miss Marple's Final Cases*, Agatha Christie, HarperCollins Publishers.
4. *The Innocence of Father Brown*, G.K. Chesterton, Maple Press.

HSS - II Sociology, History, Political Science

Course Title	**Introduction to Sociology**	Course No.	**HS455**
Department	HSS	Structure (L-T-P-C)	3-0-0 [3]
Offered for	UG	Type	Elective
Pre-requisite	None		

Objectives

1. To introduce basic sociological perspectives to understanding the world
2. To help students examine their own social experiences from a scientifically inquisitive perspective
3. To understand how one's social position within unequal societies allows for different kinds of expression of selfhood and varied life experience.

Learning Outcomes

1. Develop a holistic understanding of sociological perspectives
2. Apply sociological concepts, terms, and theories to the processes of everyday life
3. Identify historical contexts that have shaped (and continue to shape) social constructions of inequalities and social stratifications, such as race, ethnicity, gender, social status, economic class, and religion

Contents

Introduction: What is Sociology? Why study Sociology (5 lectures); Sociological Theories and Perspectives (5 lectures)
Social Structures, Social Processes, and Social Institutions: Social Stratifications (Ethnicity, Race, Caste, Gender, Social Class) (6 lectures); Intimate Relations (Marriage and the Family); Social Institutions (Education; Religion; Economy); Social Inequalities (Poverty and Inequality); Social Processes (Migrations and other mobilities) (6 lectures)
Community, Globalisation and Environment: Urban Sociology (5 lectures); Transnational Corporate Power, and the Environment (6 lectures)
People, Places, and Technology: Science as a social process(4 lectures); Sociologies of Medicine and Healthcare; Technology, Networks, and Image representations (5 lectures)

Text Books

1. Deshpande,S., *Contemporary India: Sociological Perspectives*, Viking, 2003
2. Macionis,J. J., and Plummer K., *Sociology: A Global Introduction*, Prentice Hall, 2012
3. Weber,M., *Basic Concepts in Sociology*, Citadel Press, 1993

Title	**Digital Society**	Number	HSL4XX0
Department	HSS	L-T-P [C]	3–0–0 [3]
Offered for	UG and PhD	Type	Elective
Prerequisite	None		

Objectives
The Instructor will:
1. Introduce students to the dominant discourses that frame debates on digital society
2. Familiarize students with the literature pertaining to web technologies and their cultural, legal and ethical formations and practices
3. Familiarize students with the complex relationships between digital cultures and digital divides

Learning Outcomes
The students are expected to have the ability to:
1. Identify the ways in which digital media shape identity
2. Utilize new opportunities for meaningful data collection from and using sophisticated forms of artificial intelligence
3. Identify knowledge and truth amongst the abundance of information

Contents
Introduction to Digital Society: Digital components of a connected society (5 lectures)
Theorizing Digital Society: New forms of power; Data as sociomaterial objects; Archives; Digital veillance (7 lectures)
Digital Identities and Relationships: Self and the Digital Society; Embodied Identities in Digital Society; Bias and Privilege – Digital Inequalities; Marginalised Histories**;** Cyborgs (7 lectures)
Digital Spaces and Practices: Rethinking space and surveillance in digital societies; Gender, Space, and Place in Digital Societies**;** Urban Informatics and Sociological Imagination -Smart cities**;** Digital Healthcare; Mobility in Digital Society; Digital Heritage (8 lectures)
Network Society: The Internet as a Network; Networks and the Cultural Imaginary; Inequalities in the Network Society; Information Capital; Interface Design for Diverse Populations (8 lectures)
Re-conceptualizing Research in a Digital Age: Information Management – Data Analysis Software**;** Large Digital Systems; Data protection and the politics of data privacy (7 lectures)

Title	**Urban Sociology**	Number	HSL 4xx0
Department	HSS	L-T-P [C]	3-0-0 [3]
Offered for	UG	Type	Elective
Prerequisite	None		

Objectives

1. To help students understand the history of modern cities and how urban life today came to be the way it is
2. Critically analyse proliferation of urban spaces and understand how these spaces can be biggest asset to humanity, as well as its biggest threat
3. Study Urban inequality

Learning Outcomes

The students are expected to have the ability to:

1. Understand urban life and its socio-historical genealogies
2. Critically analyse urban spaces and inequality in those spaces
3. Think of urban problems and solutions to the have a better urban life

Contents

1. Sociological perspectives on the city – Globalisation and the city, Urban planning and desing and politics of it, Urban Lives, Urban Violence - 12
2. Geography, Space and Identity – Neighborhoods and social networks, Space and Identity, Aesthetics and Archtechture - 10
3. Landscapes of Urban Life – Technology and the city, Formations and Transformation of space, Urban Networks, Mobility and speed - 9
4. The Underlife of cities – Underclass in the city, Distress migration and quality of life, Urban Street Cultures - 11

Text Books: A handbook with all the study material will be given to the students.

Title	**Development and Environment**	Number	**HSL3060**
Department	HSS	L-T-P [C]	3-0-0 [3]
Offered for	UG	Type	Elective
Prerequisite	None		

Objectives

The instructor will:

1. Provide a critical understanding of the way development discourse is conceptualized and contested in social sciences literature.
2. Introduce students to the debates on development and environment and help them better understand the contemporary issues in the field of environmental paradigms.
3. Facilitate students to understand different perspectives on development policy and environmental governance, especially in the socio-historical and political context of India.

Learning Outcomes

The students are expected to have the ability to:

1. Interpret the theories and concepts underlying the principles and practices of environment, sustainable development and natural resource management.
2. Develop the capacity to participate in debates on development and environmental discourses and governance.
3. By the end of the course, students will be able to understand the development and environmental policies and prepare them for further research in these areas.

Contents

Historical Location of the Idea of Development: Perspective from the Third World (2 lectures)
Dominant Development Paradigm and its critique (6 lectures)
Theories and Actors in Development Politics: State, Civil society, Market Forces, International, National and Local Levels (6 lectures)
History of development in India across space and time: experiences, policies, achievements, and development projects, development-induced displacement in Indian context (6 lectures)
Environmental historical discourse of India across space and time (3 lectures) *Environmental Paradigms:* Theoretical and Empirical Perspectives from India and Global South (6 lectures)
Gender and Environment: Feminist political ecology, environmental movements and case studies from global South (4 lectures)
Natural Resource Management and Role of Local Communities: use, access, management, and technology issues, recent conflict over natural resources (6 lectures)
Sustainable Development and Environment Research: challenge of sustainable development, and a way forward (3 lectures)

Textbook:

A handbook with all the study material will be given to the students.

Objectives
The Instructor will:
1. To examine hierarchical differentiation that characterize human society
2. To analyse ideological and practical explanations offered to justify social inequalities
3. To identify the intersectionality that create and sustain social inequalities

Learning Outcomes
The students are expected to have the ability to:
1. Develop sensitivity to social inequality
2. Develop reflexivity and understand privilege
3. Address issues of social inequality while designing technical solutions

Contents
1. *Introduction: Concept and Theories* – Introduce the concept of social stratification and most significant theories around the concept (7 lectures)
2. *Forms of Stratification: Class* - Theories and empirical studies on class analysis and transformation of class structures (10 lectures)
3. *Forms of Stratification: Caste* – Theories on caste, Empirical studies with a focus on contemporary India. Caste in Labour markets. Export of caste (9 lectures)
4. *Stratification and Gender:* Gender inequalities, labour market and inequalities, intersectionality of Gender with class, caste and race (8 lectures)
5. *Race, Ethnicity and stratification* – Race and social inequality, Race and colonization (8 lectures)

Text Books: A handbook with all the study material will be given to the students.

Reference Books:

1. Gupta, D. ed. 1991. *Social Stratification.* Delhi: Oxford University Press.
2. Tumin, M. M. 1953. *Some Principles of Stratification: A Critical Analysis. American Sociological Review,* 18 (4): 387-94

HSS - III Economics, Public Health

Title	**Microeconomics-1**	Number	**AIL4010**
Department	AIDE (CMCE)	L-T-P [C]	3-0-0 [3]
Offered for	B. Tech.	Type	Core for minor, Elective for all others
Prerequisite	None		

Objectives

1. Introduce the fundamental principles of individual decision-making.
2. Formalize the decision-making behavior for consumers as well as producers.
3. Set up the general equilibrium model and price determination.

Learning Outcomes:

1. Understanding of axiomatic approach of economic decision-making.
2. Modeling economic decision-making in a tractable form and analyze the comparative-statics.
3. Understanding of basic market mechanisms and fundamentals behind price determination.

Course Content:

Preferences: axiomatic approach and examples. (4 lectures)
Utility theory: representation theorem and examples. (4 lectures)
Cardinal vs ordinal approaches. (3 lectures)
Utility maximisation problem. (4 lectures)
Demand analysis. (3 lectures)
Expenditure minimisation problem as dual and Hicksian demand. (3 lectures)
Integrability and recoverability (2 lectures)
Weak axiom of revealed preference (3 lectures)
Producer theory: profit maximisation and cost minimisation. (3 lectures)
Welfare theorems (3 lectures)
Market structures: Perfectly competitive market , Monopoly and discrimination (4 lectures)
Strategic aspects in market structure: oligopoly (3 lectures)
General equilibrium. (4 lectures)

Reference Books:

1. A Short Course in Intermediate Microeconomics with Calculus. Feldman, A. & Serrano, R. , CUP, 2018.
2. Microeconomic theory. Mas-colell, A., Whinston, M.D., Green, J. R., Oxford University Press, 1995.
3. A Course in Microeconomic Theory. David M. Kreps, Princeton University Press, 1990.

Title	**Microeconomics-2**	Number	AIL4XX0
Department/School	AIDE (CMCE)	L-T-P [C]	3-0-0 [3]
Offered for	B. Tech (All Branches), P.G., Ph.D.	Type	Core for minor, Elective for others
Prerequisite	Microeconomics-1		

Objectives

1. To introduce strategic interactions among the rational economic agents in the general equilibrium framework
2. To equip students with concepts from market design such as auction theory.
3. To provide a thorough analysis of general equilibrium theory.

Learning Outcomes

1. In depth understanding of strategic interactions in various economic models.
2. Understanding of dual economic decision-making of rational agents in a general equilibrium setting.

Course Content

Game theory: normal form games, common knowledge assumption, strategies, Nash equilibrium, simultaneous move games and examples, games of perfect information, games of imperfect information. (5 lectures)

Information economics: adverse selection and moral hazard problems, examples, information and market performance. (12 lectures)

Auctions and mechanism design problems. (13 lectures)

General equilibrium theory: Debreu's axiomatic approach to characterize equilibrium in competitive market - existence, uniqueness and stability; core and equilibria. (12 lectures)

Reference Books:

1. Microeconomic theory, Mas-colell, A., Whinston, M.D., Green, J. R., OUP, 1995.
2. Theory of value: an axiomatic analysis of economic equilibrium, Debreu, G., Cowles Foundation, 1977.
3. Game theory, Fudenberg, D., Tirole, J., MIT Press, 1991.
4. Advanced microeconomic theory, Jehle, G.A., Reny, P.J., Pearson, latest edition.

Title	**Health Economics**	Number	HSL4070
Department	HSS	L-T-P [C]	3-0-0[3]
Offered for	UG	Type	Elective
Prerequisite	None		

Objective

1. To be able to evaluate the health sector in India using economic tools.
2. To have a global perspective and a broad understanding of institutional changes currently in the Indian healthcare system.

Learning Outcomes

1. Understand microeconomic concepts and their application for the health sector.
2. Understand the role of economic incentives, competition and regulation on the functioning of the health care system.
3. Understand the health care insurance sector and financing of health care.
4. Understand how different healthcare systems function around the world.

Contents

Introduction to health economics*:* An introduction to health, health care, health system and health economics (*5 lectures*).

Microeconomic and statistical concepts*:* Demand, supply, elasticity, production, market structures, economic efficiency & cost-benefit analysis, economic evaluation, and valuation of human life, regression analysis, statistical inference (*12 lectures*).

Supply and Demand for health*:* Health production function and cost of health care, health demand, human capital model and the determinants of demand for health, demand for and supply of health insurance, uncertainty, adverse selection and moral hazard in the health insurance market (*10 lectures*).

Healthcare Industry*:* Market Structure of health care industry, types and characteristics of various health care providers, India's healthcare system (*5 lectures*).

Government and Health care systems*:* Healthcare financing, rationale for government intervention in health care market and the nature of intervention by government in health care sector, Comparison of healthcare systems in different countries, Universal Health Coverage in India (*10 lectures*).

Reference Books

1. Introduction to health economics. Guinness, & Wiseman. McGraw-Hill Education (UK), 2011.
2. McPake, B., Normand, C., Smith, S., & Nolan, A. (2020). *Health economics: an international perspective*. Routledge.
3. *The Economics of Health and Health Care*, Sherman Folland, Pearson, 7/e, 2012
4. *Health Economics for Developing Countries: A Practical Guide*, Witter S, T Ensor, M Jowett, and R Thompson, McMillan Education Ltd, 2000

Title	**Industrial Organisation**	Number	**HSL7XX0**
Department	HSS	L-T-P [C]	3-0-0 [3]
Offered for	UG and PhD	Type	Elective
Prerequisite	None		

Objectives

1. To familiarise students with fundamental concepts used for economic analysis of firm behavior.
2. To equip the students with knowledge of benchmark models and strategic interactions.
3. To introduce students to varied applications of theoretical models.

Learning Outcomes

1. A detailed understanding of various market structures and their implications for firms and consumers.
2. Ability to formally analyze firm behavior from an economic and strategic perspective.
3. Knowledge and understanding of important models and observable applications.

Contents

1. *Introduction to concepts for economic analysis:* what is industrial organisation, overview of theoretical and empirical perspectives, law of diminishing marginal returns, demand function, cost function, profit maximization. (7 lectures)
2. *Market structures and strategic techniques:* perfect competition, monopolistic competition and monopoly, market power, efficiency and public policy, firms as strategic agents and Nash equilibrium. (7 lectures)
3. *Price discrimination:* perfect price discrimination, multi-market price discrimination, arbitrage and screening, non-linear pricing. (6 lectures)
4. *Static and Dynamic competition:* Bertrand paradox and capacity constraints, Cournot model, concentration indices, static approach to dynamic pricing, repeated interaction and collusion, price rigidities and excess capacity. (7 lectures)
5. *Non-price competition:* advertising, market power, information, R&D and innovation. (3 lectures)
6. *Product differentiation:* spatial competition models, advertising and information, vertical differentiation. (5 lectures)
7. *Entry, accomodation and exit:* natural monopoly and barriers to entry, stackelberg competition and applied strategies for deterrence. (5 lectures)
8. Network effects, auctions, strategic policy commitment and international trade. (2 lectures)

Title	**Health and Development**	Number	HSL4XX0
Department	HSS	L-T-P [C]	3-0-0 [3]
Offered for	UG	Type	Elective
Prerequisite	None		

Objectives

1. To understand the relation between economic development and health status across the world in the modern period.
2. To understand the social and environment determinants of health and their relationship to economic policy.
3. To introduce equity as a dimension of progress towards universal health care and the sustainable development goals.
4. To understand the impact of globalization on the wellbeing of the world.

Learning Outcomes

1. Understand the impact of economic development on the wellbeing of the world.
2. Appreciate economic growth and origins of inequality.
3. Conceptually understand the inequalities in health and role of social determinants.

Contents

Introduction to basic concepts of health and development: Health, illness and diseases, medicine, birth rate, death rate, life expectancy, mortality, morbidity, communicable and non-communicable diseases, gross domestic product, gross national income, human development, political economy of health and development (10 lectures).

Wellbeing of the world: Different measures of wellbeing, health status in the modern world, life-expectancy, happiness index, and human development (7 lectures).

Inequalities in health, and social determinants of health: Social determinants of health; The Rio Declaration on Social determinants of health, health disparities, unequal access and utilisation of health services, trends in global poverty and income inequality (7 lectures).

Impact of globalization on health: Five ways in which globalization affects health care-, structural adjustment programme and health, global institutions, impacts on environment, nature of work, financialization: neoliberalism and healthcare (7 lectures).

Health, Development and Challenges in India: Understanding the current inter-linkages between health and development; poverty, health and development in India; main challenges in achieving the health-SDGs in India; widening inequalities in health status of population, low investment in public health services, shortages of human resources and medicines (10 lectures).

Text Books :

1. WHO. (2008). Closing the gap in a generation: health equity through action on the social determinants of health - Final report of the commission on social determinants of health.
2. Deaton, A. (2013). *The great escape: health, wealth, and the origins of inequality*. Princeton University Press.

Title	**Indian Economic Development and Policy**	Number	**HS7XX**
Department	HSS	Structure (L-T-P-C)	3-0-0
Offered for	UG and PhD	Type	Elective
Prerequisite	None		

Objectives:
The Instructor will:
1. Introduce students to current and evolving policy debates in the backdrop of issues pertaining to economic development of India.
2. Familiarize students with economic development issues and policy aspects which are important in professions involving nation-building broadly and policy formulation and implementation specifically.

Learning Outcomes:
The students are expected to have the ability to:
1. Equipped with understanding of issues in Indian economic development and ensuing evolution of policy debates.
2. Able to have a broad perspective of the multifaceted nature of economic development issues and incorporate this in their professional pursuits.

Contents:
Brief overview of economic growth and development policies in India since Independence
Agriculture: Policies and Performance; Growth; productivity; agrarian structure and technology; capital formation; trade; pricing and procurement.
Industry: Policies and performance; production trends; small scale industries; public sector; foreign investment, labour regulation
Services: Policies and performance, trends, patterns, composition, drivers
Employment **:** Occupational structure in the organised and unorganised sectors; open-, under- and disguised- unemployment (rural and urban); employment schemes and their impact
Growth and Distribution: Trends in poverty, inequality and unemployment, Policies for eradicating poverty and generating employment
Population and Economic Development: Demographic trends and issues, Education, Health and Malnutrition
International Trade: Performance and Policies, trends and patterns of imports and exports, FDI, FII
Selected Readings (will be revised periodically, given the dynamic nature of the course contents):
1. P. Agrawal (ed.) (2018). Sustaining High Growth in India. *Cambridge University Press*
2. U. Kapila (2015). India Economy Since Independence. *Academic Foundation*
3. Krueger, A. O. (Ed.) (2002). Economic policy reforms and the Indian economy. *University of Chicago Press.*
4. Banerjee, A. V., & Duflo, E. (2011). Poor economics: A radical rethinking of the way to fight global poverty.
5. Basu, K., & Maertens, A. (2012). The New Oxford Companion to Economics in India. *Oxford University Press.*
6. Jean Dreze and Amartya Sen(2013). India: An Uncertain Glory. *Allen Lane*
7. K. James (2008). Glorifying Malthus: Current Debate on Demographic Dividend in India. *Economic and Political Weekly*

Title	**Political and Institutional Economics of Development**	Number	**HSL7460**
Department	HSS	Structure L-T-P (C)	3-0-0 (3)
Offered for	UG and PhD	Type	Elective
Prerequisite	None		

Objectives:
The Instructor will:
As the economy is embedded in society, economic interactions and decisions are shaped and constrained by its framework of institutions, be it the state, individuals, formal laws or social norms. Economic development therefore, is inevitably and intricately linked with, and determined by political economy, social norms and institutions. It is this idea that this course explores.

Learning Outcomes:
The students are expected to have the ability to:
-Appreciate the importance of institutions, politics and society in economic growth and development
-Appreciate the importance of the impact of intricately-related institutional and political aspects on individual decisions and actions, society and the economy.

Contents:
Institutions: Essence of Institutional Economics, Role of Institutions in Growth and Development, Varieties of Capitalism, Institutional Political Economy
State, Law and Economy: Economic Role of Political Institutions, State Actors, Issues in Law and Economics
Social Norms, Beliefs, Culture and Preferences: Role of social norms in individual preferences and economic outcomes, Role of Beliefs in Decision-making, Culture and Development
Issues in Political Economy**:** Economics of Bureaucracy, Corruption, Media, Elections, Policies, 2008 Crisis, Bankruptcy Law
Conflict: Economic Causes and Consequences of Democracy, Violence, Cooperation, War
Selected Readings (will be revised periodically):
1.Acemoglu, D., Johnson, S., & Robinson, J. A. (2005). Institutions as a Fundamental Cause of Long-run Growth. *Handbook of Economic Growth. Elsevier*

2.Chang, H. J. (2011). Institutions and economic development: theory, policy and history. *Journal of institutional economics*

3.Engerman and Sokoloff (2000). History Lessons: Institutions, Factors Endowments, and Paths of Development in the New World. *Journal of Economic Perspectives*

8.Varoufakis, Y., Halevi, J., & Theocarakis, N. (2012). Modern Political Economics: Making Sense of the Post-2008 World. *Routledge*

9.Gangopadhyay, S., & Santhakumar, V. (Eds.). (2013). *Law and Economics: Volume I: Theory, Volume II: Practice*. SAGE Publications India.

10.Bardhan, P. (2004). Scarcity, Conflicts, and Cooperation: Essays in the Political and Institutional Economics of Development". *MIT Press.*

11.Bardhan, P. (2015). Reflections on Indian Political Economy. *Economic and Political Weekly*

Title	**Foundations of Finance**	Number	HSL4XX0
Department	HSS	L-T-P [C]	3-0-0 [3]
Offered for	UG	Type	
Prerequisite	None		

Objectives

1. The course will help students to acquire breadth of knowledge of the various segments in financial markets.
2. Introduce the functioning of Banking and financial market structure
3. This course aims at providing the students the intricacies of Indian financial system for better financial decision making.
4. This course will address many critical personal financial management topics in order to help students to learn prudent habits both while in college and throughout lifetime. Through this course, the students will cover a variety of personal finance topics, including budgets, investing, and managing risk.

Learning Outcomes

1. Students will develop an in depth understanding of the linkages and the interconnected nature of the global currency, bond, commodity and equity markets.
2. Students will understand the importance of Indian financial system in the economic development of the country as it encourages both savings and investment
3. This course will teach students on how to master their money, how to grow income, reduce debt, budget the smart way, invest money, and manage taxes and not avoiding them.

Contents

Module 1: Basics of Money, Banking and Financial Markets: An overview of the Financial System, Money; Understanding Interest rates and its behavior, Central Banks and the Federal Reserve System, Money Supply Process, The stock market, The theory of rational expectations, and the efficient market hypothesis, An economic analysis of the financial structure and regulation, Financial Crises in advanced economies, Financial Crises in emerging economies, Banking and Management of Financial Institutions, Basics of Indian Financial System, Trends and Progress on Banking, RBI, SEBI and NSE India Annual Reports, Discussion on World Development Report and IMF report (16 lectures)
Module 2: How Finance Works: Financial Analysis, Financial Perspective, Source of value creation, The art and science of valuation, Capital allocation (16 lectures)
Module 3: Personal Finance Basics: Personal Finance, Saving Money for the future, Managing Debt, Fundamentals of Investing, Risk management in personal finance, Personal Tax Management (10 lectures)

Textbook

1. Mishkin, F.S. 2019. The economics of Money, Banking and Financial Markets. 10th edition. Pearson India.

Other Reference Books

1. Machiraju, 'Indian Financial System' – Vikas Publishing House, 2nd Edition, 2002.
2. Varshney P.N., & Mittal D.K., 'Indian Financial System', Sultan Chand & Sons, New Delhi. 2002.

Title	**Individual and strategic decision making: theory and applications**	Number	**AIL4XX0**
Department	AIDE (CMCE)	L-T-P [C]	2-0-0 [2]
Offered for	UG and PhD	Type	Core for minor, Elective for others
Prerequisite	None		
Exclusions	Introduction to game theory MAL4310		

Objectives

1. Introduce students to the fundamentals of game theory and strategic behaviour.
2. To provide a formal and intuitive understanding of solution concepts in game theory.
3. To equip students with knowledge of simultaneous and extensive form games.
4. To familiarise students with economic and behavioral applications of game theory.

Learning Outcomes:

1. Understanding of fundamentals of game theory: game forms, strategies, equilibrium notions, rationalizability, solution concepts and techniques.
2. Students will be able to model strategic behaviour in various economic settings.
3. Students will be equipped with formal knowledge of solution concepts and techniques which have broad applications for problem solving in various strategic settings.

Course Content:

Introduction to strategic games (2 lectures)
Strict and weak domination (2 lectures)
Rationalizability and iterated elimination (4 lectures)
Nash equilibrium (3 lectures)
Pure and mixed strategies (3 lectures)
Correlated equilibrium and strategies (1 lectures)
Bayesian games and Bayesian equilibrium (2 lectures)
Extensive form games (2 lectures)
Games of perfect and imperfect information (2 lectures)
Backward induction procedure (2 lectures)
Repeated games: finite and infinite (3 lectures)
Folk theorems (2 lectures)

Reference Books:

1. Martin J. Osborne and Ariel Rubinstein, "A Course in Game Theory", MIT Press (1994).
2. Drew Fudenberg and Jean Tirole, "Game Theory", MIT Press (1991).
3. Michael Maschler, Ellon Solan and Shmuel Zamir, "Game Theory", CUP (2013).

Title	**Social and Economic Networks**	Number	**AIL7XX0**
Department/School	AIDE (CMCE)	L-T-P [C]	3-0-0 [3]
Offered for	B. Tech./PG/Ph.D.	Type	Elective
Prerequisite	Individual and strategic decision making: theory and applications		

Objectives:
1. To introduce students to formal methods of modeling formation and evolution of networks.
2. To provide conceptual understanding of applications of network theory to social and economic problems.
3. To provide knowledge of benchmark models.

Learning outcomes:
1. Students will be equipped to model and analyze a wide variety of social and economic networks.
2. Students will gain an understanding of key concepts and important models.
3. Students will be familiar with the tools required for strategic analysis of networks.

Course content:
Introduction to networks: need for modeling networks, applications in economics and society. (3 lectures)

Representing and measuring networks: nodes, players and graphs; types of networks; degree and density; degree distribution; clustering; cliquishness; centrality. (7 lectures)

Random networks: Poisson networks; Markov graphs; Expected degree model etc.; properties of random networks. (8)

Network games: stability; efficiency; diffusion and learning; strategic interactions and network structure; equilibria notions; dynamic behavior and contagion. (16)

Economic applications: trade; information transmission and beliefs; public goods; influence etc. (9 lectures)

Reference Books:
1. Matthew O. Jackson, "Social and Economic Networks", Princeton University Press (2008).
2. Gabrielle Demange and Myrna Wooders Eds. "Group Formation in Economics Networks, Clubs, and Coalitions", Cambridge University Press (2005).
3. Bhaskar Dutta and Matthew O. Jackson Eds. "Networks and Groups: Models of Strategic Formation", *Studies in Economic Design,* Springer (2003).

Research papers:
1. Galeotti, A., Sanjeev Goyal, M. O. Jackson, Fernando Vega-Redondo, and Leeat Yariv. "Network Games." *The Review of Economic Studies* 77, no. 1 (2010): 218-44.

Title	**Behavioral Economics and Decision theory**	Number	**AIL7XX0**
Department/School	AIDE (CMCE)	L-T-P [C]	3-0-0[3]
Offered for	B. Tech./P.G./Ph.D.	Type	Elective
Prerequisite	Microeconomics-1		

Objectives:

1. To familiarise students with standard models of individual decision-making.
2. To equip students with different modeling techniques.
3. To provide an overview of current literature in bounded rationality and it's intersections with AI.

Learning Outcomes:

1. Knowledge of fundamentals of decision theory and modeling techniques.
2. A deep understanding of bounded rationality and formal approaches for modeling behavioral phenomena.
3. Development of conceptual understanding required for application of decision theoretic models and framework to various relevant settings such as online e-retailing, search algorithms, etc.

Course Content:

Rational choice: binary relations, preference orderings, representation theorems (7 lectures)
Important axioms in choice theory, their relevance in characterizing choice and underlying behavioral intuition: WARP, GARP, Independence axioms etc. (7 lectures)
Decision theory models with boundedly rational agents: imperfect attention, cognitive constraints, attribute based models, framing effects, etc. (7 lectures)
Stochastic choice models: random utility model, Luce rule, two-stage decision making etc. (6 lectures)
Decision-making under uncertainty: subjective probabilities, V-N-M theorem, de-Finetti's theorem, Savage's theorem, Anscombe-Aumann framework. (9 lectures)
Applications of decision theory in AI: list-based decision making models and online search, e-retailing platforms, stop-and-choose decision rules, attention and online advertising etc. (7 lectures)

Reference Books:

1. David M. Keeps, "Notes on the Theory of Choice", Westview Press (1988).
2. Itzhak Gilboa, "Theory of Decision under Uncertainty", CUP (2009).
3. Paul Anand, Prasanta Pattanaik and Clemens Puppe, "The Handbook of Rational and Social Choice", OUP (2009).

5. Ran Spiegler, "Bounded Rationality and Industrial Organisation", OUP (2018).

HSS - IV Philosophy, Policy, and Governance

Title	**Introduction to Philosophy**	Number	HSL4XX0
Department	HSS	L-T-P [C]	3-0-0 [3]
Offered for	UG	Type	Elective
Prerequisite	None		

Objectives

1. Analyze and understand philosophical problems related to knowledge, science, and life
2. Familiarize with schools of thought which respond to the above problems
3. Evaluate the merits and demerits of these responses by developing one's own stance

Learning Outcomes

1. Gather knowledge in evaluating philosophical problems within the analytic school of thought
2. Acquaint oneself with the existential school of thought in philosophy
3. Develop intellectual responsiveness by discerning, debating and developing ideologies

Contents

Preliminaries: Reasoning: deduction, induction and abduction (scope and limits); Propositions: analytic and synthetic (viability of this distinction); Knowledge: a priori and a posteriori; Definitions: types of definitions; Kinds: natural and social; Judgments: fact and value; Social phenomena: reasons, actions and justifications; Natural phenomena: causes, effects and explanations; Conditions: necessary and sufficient (10 lectures)

Knowledge: Sources of knowledge; reason and experience; skepticism, rationalism and empiricism; The standard definition of knowledge: knowledge as justified true belief; difficulties with the standard definition; Gettier's paradox: proposals to overcome Gettier's paradox; the naturalistic turn (8 lectures)

Science: Nature of laws and theories in natural Science; Problems of confirmation; the problem of induction; Hempel's approach; Theories of scientific explanation: epistemic, nomic and ontic; Socio-historical schools in philosophy of science; Thomas Kuhn and Paul Feyerabend (10 lectures)

Life and Existence: Existentialist perspectives in philosophy: Nietzsche, Sartre and Camus; The existentialist perspectives on life: nihilism and the absurd; Nietzsche and Levinas: a comparison; Technology and alienation: Marxist views, Heidegger's critique of technology; Feminism: the history of feminism, key thinkers, feminist critique of Western thought (14 lectures)

Title	**Fundamentals of Logic**	Number	HSL4010
Department	HSS	L-T-P [C]	3-0-0 [3]
Offered for	UG	Type	Elective
Prerequisite	None		

Objectives

The main aims of the course are:
(1)Learning effective methods to solve a variety of disagreements.
(2)Obtaining the ability to identify different types of arguments and evaluating them
(3)Obtaining the ability to translate ordinary language into logical language

Learning Outcomes

(1)Developing the ability to prove valid arguments by using different methods of proof.
(2)Realizing that proper use of logic is an effective and reasonable way in resolving disagreements.

Contents

Introduction: Nature, scope and history of logic, various types of arguments, validity, truth and soundness, complexity of natural language, symbolization.
Propositional Logic: truth functions, truth tables, indirect truth tables, rules of implication, rules of replacement, indirect proof, conditional proof.
Syllogistic Logic: categorical propositions, quality, quantity, distribution, traditional square of opposition, Venn diagrams and modern square of opposition, conversion, obversion and contraposition, categorical syllogisms, mood and figure, rules and fallacies.
Predicate Logic: symbols and translation, using rules of inference, change of quantifier rule, conditional and indirect proof, relational predicates and identity.

Reference Books:

1. Hurley, Patrick (2008) *Introduction to Logic*(India edition) Imprint, Wadsworth.
2. Copy, Irving (2006)*Symbolic Logic* Prentice-Hall of India, Pvt.Ltd.
3. Lepore, Ernest and Cumming Sam *(2009)Meaning and Argument* Wiley Blackwell.

Title	**Critical Thinking**	Number	HSL4XXX
Department	HSS	L-T-P [C]	3-0-0 [3]
Offered for	UG	Type	Elective
Prerequisite	None		

Objectives
The Instructor will:
1 Help the students in developing the ability to think critically and cogently
3. Developing the ability to recognise fallacies and overcome them
3- Appreciate the recent developments in the study of cognition that shed light on how reason is fallible in everyday life.

Learning Outcomes
1.Knowing 'how to think' and not just 'what to think'
2. A critical mind set which includes being self critical
3. Developing qualities like inquisitiveness, open mindedness and intellectual honesty.

Lecture Modules/Contents:
1. introduction : The difference between normal thinking and critical thinking, Reason and its applications, The need for critical thinking(5 lectures)
Empirical evidence for improvement in critical thinking, Marks of a critical thinker, Four-Part Model for critical thinking (5 lectures)
Cognitive Illusions:: Illusions of thinking: conjunction fallacy, confirmation bias, base rates in Bayesian inference, illusory correlation, illusory control. Biases in deductive reasoning, Illusions of judgement: availability, representativeness, anchoring effect, validity effect, (5 lectures)
Illusions of memory: Moses illusion, orientation illusion, associative illusion, misinformation effect, hindsight bias, illusions of change or stability(5 lectures)
Fallacies in everyday reasoning : Fallacies of Relevance: appeal to force, appeal to pity, appeal to people, argument against the person, red derring, straw man, missing the point.(5 lectures)
Fallacies of Weak Induction: Appeal to unqualified authority, appeal to ignorance, hasty generalisation, false cause, slippery slope, weak analogy, Fallacies of Presumption:begging the question, complex question, false dichotomy, amphiboly, composition and division (6 lectures)
Modeling Cognition: Two systems,Adaptive Unconscious , Evolutionary Reasons, Dolphin Model of cognition(5 lectures)
Practical lessons : Diagnosing fallacies, strategies to think without committing the fallacies.(5 lectures)

Title	**Cognitive Semantics**	Number	32209/HSL4xxx
Department	HSS	L-T-P [C]	3-0-0 [3]
Offered for	UG	Type	Elective
Prerequisite	None		

Objectives

1. To provide an overview of the field of cognitive semantics which tries to explain the phenomenon of linguistic meaning as part of overall cognitive capacities.
2. To explore the basis of ingrained assumptions concerning meaning, reason, imagination and understanding

Learning Outcomes

1.Understanding how linguistic capacity can arise out of overall cognitive capacities.
2. Understanding how metaphors are all-pervasive in our lives and the need to revisit many of the metaphors used in day to day conceptualisations

Course Contents

Introduction: Guiding principles, Generalisation commitment and cognitive commitment. Phenomena investigated within cognitive semantics,methodology and comparison with formal semantics (6 lectures)

Embodiment: Image schemas and their properties, list of image schemas and their relation with abstract thought, conceptual structure(6 lectures)

Encyclopaedic view of meaning: word meaning versus sentence meaning, frame semantics, theory of domains (6 lectures)

Categorisation and Idealised Cognitive Models : Prototype theory, Idealised Cognitive Models.(6 lectures)

Metaphor and Metonymy: Conceptual Metaphor Theory, Primary Metaphor Theory, Conceptual Metonymy(6 lectures)

Meaning Construction: Cognitive theory of meaning construction, the architecture of mental space construction, the dynamic nature of meaning construction (6 lectures)

Reference Books

1. Evans, Vyvyan and Green Melaine(2006) *Cognitive Linguistics: An Introduction* Edinburg University Press
2. Johnson, Mark (1987)*Body in the Mind: The bodily basis of Meaning, Imagination and Reason*, University of Chicago Press.
3. Lakoff, George and Johnson, Mark(199) *Philosophy in the Flesh* Basic Books.
4. Talmy, L (2003)*Towards a Cognitive Semantics* MIT Press.

Title	**Philosophical Problems**	Number	HSL4020
Department	HSS	L-T-P [C]	3-0-0 [3]
Offered for	UG	Type	Elective
Prerequisite	None		

Objectives

1. To help students developing a firm and well founded Weltanschauung
2. To encourage them looking beyond the phenomenal realities
3. To nurture inquisitive spirit

Learning Outcomes

1. Achieving a firm and well founded worldview
2. Understanding the limits of human faculties and manmade sciences
3. Realizing the meaning of human life and existence

Contents

Introduction: Nature and Scope of Philosophical Inquiry; The Story of Philosophy; Methodology of Philosophy; Major Areas of Philosophy (8 lectures)

Epistemological Problems: Nature of Knowledge; Sources of Knowledge: Eastern and Western Perspectives; Validity of Knowledge; Skepticism; Theories of Truth; The Problem of Perception; Objectivity; The View from Nowhere: Philosophic (and Scientific) Concepts; Explanation; Causation; Evidence; Prediction; Probability; Determinism; Reduction; Generalization; Universals; Space and Time; Modeling and Simulation; Truth Value (10 lectures)

Metaphysical Problems: The Laws of Nature; Existence of World and Humanity; Free Will; Mind-Body Problem; Concept of God; The Life After (10 lectures)

Ethical Problems: The Sense of Moral Obligation; Grounds of Morality; Moral Luck; Justice; Meaning of Life (14 lectures)

Reference Books

Title	**Introduction to Indian Philosophy**	Number	HSL4xx0
Department	HSS	L-T-P [C]	3-0-0[3]
Offered for	UG	Type	Elective
Prerequisite	None		

Objectives
The course will:
1. Present an overview of major schools of Indian thought
2. Introduce major intellectual and cultural contributions of Indian philosophical traditions

Learning Outcomes
The students are expected to have the ability to:
1. Identify the richness of Indian culture and wisdom
2. Know the significance of Indian intellectual tradition in addressing contemporary issues

Contents
Indian Philosophy: Basic Features: Major traits; Major schools; value of the study of Indian philosophy
The Vedic Tradition: The ideas of God and world; major concepts of the Vedas; metaphysics, moral life
Carvaka, Buddhism and Jainism: Nastika schools, views of Carvaka; Jaina metaphysics, epistemology and ethics; Buddhism: the four noble truths and implications
Six Great Systems: Nyaya, Vaisesika, Samkhya, Yoga, Purva Mimasa and Vedanta; Major concepts and contributions
Advaita Vedanta: Monism; Concepts of God, world, self and liberation; visitadvaita and neovedantic traditions; significance of Advaitic philosophy today
Modern Indian Thinkers: Vivekananda, S. Radhakrishnan, Gandhi, Aurobindo, Nehru, Narayana Guru

Title	**Theories of Justice**	Number	HSL4xx0
Department	HSS	L-T-P [C]	3-0-0[3]
Offered for	UG	Type	Elective
Prerequisite	None		

Objectives
The course will:
1. Introduce major philosophical positions on justice
2. Present the role of justice in diverse contexts of sociopolitical life

Learning Outcomes
The students are expected to have the ability to:
1. Understand the philosophical foundations of the concept of justice
2. Evaluate the present social order and envision a just social structure

Contents
Justice: Early Notions: Hellenistic tradition: Socrates, Plato, and Aristotle; the principle of harmony and order; major religious traditions; Indian tradition
Justice in Utilitarian View: consequentialism; the idea of greatest welfare; balancing individual happiness and social welfare; major thinkers and seminal works
Justice in Libertarian Position: role of liberty of individuals; rights and limits of the state; positive and negative liberty; classical and contemporary libertarian thinkers; merits and limitations of libertarian position
Justice in Egalitarian View: equality and egality; idea of fairness; capabilities and dignity; concept of equal opportunity; major philosophers and works
Justice in Contractualist Framework: justice being determined by the terms of contracts; the centrality of freedom; major thinkers and works; limitations of the contractualist position *Applied Areas:* distributive justice; procedural justice; international justice; intergenerational Justice; restorative justice

Reference Books

Title	**Gandhian Thought**	Number	HSL4xx0
Department	HSS	L-T-P [C]	3-0-0[3]
Offered for	UG	Type	Elective
Prerequisite	None		

Objectives
The course will:
1. Introduce Gandhian philosophical concepts
2. Present social, political, and cultural implications of Gandhian thought

Learning Outcomes
The students are expected to have the ability to:
1. Assimilate Gandhian values in personal and social life
2. Identify the relevance of Gandhian views to the present day world

Contents
Gandhian Thought: Introduction: Uniqueness of Gandhian thought; the necessity to turn to the Gandian views; the nature and scope of Gandhian philosophy; major works
Major Inspirations to Gandhi: The triad: Thoreau, Ruskin, and Tolstoy; Indian philosophical traditions: the Upanisads and the Gita; religious traditions: Hinduism, Christianity, Jainism, and Islam
Metaphysical Thoughts of Gandhi: Truth and God; Major virtues; The Higher Law
Moral Philosophy: Peace and non-violence; means and ends; civic virtues; moralization of politics
Political Philosophy; Ideal state: Ramarajya; role of justice; the concept of democracy; satyagraha; role of morality in politics; nationalism and internationalism; swaraj; the Gandhian model in managing political disputes and maintaining international relations
Views on Development and Technological Progress: Sarvodaya; Stewardship; decentralization; panchayati raj; bread-labor; swadeshi technologies; self-reliance; relevance of Gandhian views to a sustainable future.

Title	**Role of Technology in Development**	Number	HS421/HSL4xx
Department	HSS	L-T-P [C]	3-0-0 [3]
Offered for	UG	Type	Elective
Prerequisite	None		

Objectives:
1. To provide an overview of the role of technology in the development of India

Learning Outcomes:
1. Gaining an ability to appreciate the role of engineers in the development of India
2. Understanding the present status of development in India and the path to be followed for making the country developed.

Course Contents:
Concept of Development: What Development Means, Growth and development, the historical roots of the concept of development, (6 lectures)
Development as a Multi-dimensional Process, physical and human capital in development, poverty and inequality(5 lectures)
Human Development, Human Development Index, Sustainable Human Development, Cultural Resistance to Development.(6 lectures)
Development of India: Post Independent period, History of development and planning, Goal of self reliance , Industrial Policy and Planning, Public Sector and Planning, Green revolution and its impact, Privatisation and Economic Reforms, Globalization and its Impact on India,India at 21st century.(6lectures)
Status of technology in India: State of the Art in technology, Indian science and technology in the fields of space, nuclear energy, different forms of renewable energy(6 lectures)
Status of technology in India-energy, agriculture, defense, health care, telecommunications. The potential for low cost technology.(6 lectures)
Sustainable development and technology: Enviornment versus development, India and climate change, Towards low carbon economy (6 lectures)

Title	**Disaster risk reduction and management**	Number	HSL4030
Department	HSS	L-T-P [C]	3-0-0 [3]
Offered for	UG	Type	Elective
Prerequisite	Interest in Policy, Governance, Sustainability, Law, Gender **or** Interdisciplinary/cross-discipline background		

Objectives

The Instructor will:

1. Provide an overview of the conceptual and critical understanding on policy measures on disaster governances.
2. Introduce students to examine the role of decentralization of disaster resources and responsibilities, and best practice principles in preparedness, mitigation, response, recovery and reconstruction.
3. Facilitate the students to understand the how disasters impact societies.

Learning Outcomes

The students are expected to have the ability to:

1. Interpret the theories and concepts underlying the principles and practices of disaster risk reduction and management.
2. Develop the capacity to participate in debates on disaster governance and societal reconstruction.
3. By the end of the course, students will be able to understand the disaster resilience, risk mitigation, and recovery policies.

Contents

Introduction on Disaster Risk Reduction and Management (DRR&M) across space and time: (2 lectures)

Definition and types of disaster: hazards and disasters, risk and vulnerability in disasters, natural and man-made disasters (6 lectures)

Risk management: nature, technocracy, and behavioural governance (4 lectures)

Paradigm shifts in DRR&M: policy & governance issues, UN Agenda (5 lectures)

Social and economic impact of disasters: class, communities and societies, disaster capitalism (6 lectures)

Gender and disaster: Feminist discourse (4 lectures)

Rights and justice: humanitarian aid and CSOs in DRR&M (3 lectures)

Mitigation and Management techniques of Disaster: basic principles of disasters management, disaster management cycle, national and state bodies for disaster management (6 lectures)

Community-based disaster risk management discourse analyses: 'bottom-up' approaches', community innovations (3 lectures)

Disaster and Development Research: A way forward (2 lectures)

Textbook: A handbook with all the study material will be given to the students.

Title	**Political and Cultural Ecology**	Number	HSL4xx0
Department	HSS	L-T-P [C]	3-0-0 [3]
Offered for	UG	Type	Elective
Prerequisite	None		

Objectives

1. The course will examine society-ecology relationships at different scales.
2. Provide a historical perspective to understand how past political and economic injustice in continuing environmental destruction.
3. To know the actors and actions involved in various processes of sustainable development

Learning Outcomes

The students are expected to have the ability to:

1. Analyze how inequalities of power and wealth on different scales contribute to ecological imbalance
2. Critically analyze projects on sustainable development
3. Know historical inequalities and lasting legacy in form of environmental destruction

Contents

1. *What is Political and Cultural Ecology?* Introduction to political ecology, its conceptual, historical and methodological origins - 10
2. *Social Constructions of Nature* – What is social construction of nature?, Political ecology and constructivists approaches to nature, social constructions and community management of natural resources - 5
3. *Natural resource management and conservation* – National parks, state-governed conservation, Rise of community based conservation and its critiques, critiques of different conservation techniques, Actors in conservation, Indian Context – 14
4. *Development, Degradation and Marginalization* – Explore relationship between development and marginalization of particular communities, study actors and institutions involved in the studies - 8
5. *Neoliberalism and Environmental Governance* – Neoliberalism and conservation, How do processes of neoliberalism affect ecology? Environmental management in a neo-liberal world – 5

Title	**Popular Classics**	Number	HS 3xx
Department	HSS	L-T-P [C]	3-0-0 [3]
Offered for	UG	Type	Elective
Prerequisite	None		

Objectives

The Instructor will:

1. Introduce students to a global canvas of popular classics in both literature and films.
2. Facilitate the students to understand a spectrum of values, experiences and ideas over the ages.
3. Contextualize literature and films in the context of global cultures, literatures, movements and technologies

Learning Outcomes

The students are expected to have the ability to:

1. Access enhanced creative and critical abilities, practice close reading, develop skills in structuring arguments and interpretations.
2. Create, engage and to build their personal narratives by creative interactions and discussions.
3. Reflect upon the diversity of cultures, values and creative practices from around the world and within the country

Contents:

Introduction – High Cultures and Popular Cultures

Literary Devices and Elements of Fiction – Plot, Characters, Setting, Narration, Voices, Point of View, Conflict.

Adaptations – Theories of Adaptations, Forms, Adapters, Contexts, Appeals, Audiences.

Genres – Detective Fiction, Historical fiction, Travel Writings, Life Writings, Subaltern fiction, Regional fiction, Fantasy and Fiction

Literary Analysis – Close reading, Interpretations, Critical Appreciation.

Prescribed books and films:

1. *The Guide* - R.K.Narayan
2. *The Kite Runner* - Khaled Hosseini.
3. *The Help* - Kathryn Stockett.
4. *Murder on the Orient Express* - Agatha Christie.
5. *Hound of the Baskervilles*- Sherlock Holmes.
6. *Motorcycle Diaries* - Che Guevera.
7. *Harry Potter and the Prisoner of Azkaban* - J.K.Rowling.
8. *Les Miserables* - Victor Hugo.
9. *To Kill a Mocking Bird* - Harper Lee.
10. *Hotel Rwanda* - Terry George and Keir Pearson.
11. *The Life of Pi* - Yann Martel.

Title	**Introduction to Film Studies**	Number	**HSL2XXX**
Department	HSS	L-T-P [C]	3-0-0 [3]
Offered for	UG	Type	Elective
Prerequisite	None		

Objectives

The instructor will:

1. Help students to explore the phenomenon of cinema as a scientific invention, as a cultural form and as a public institution
2. Help students to become familiar with some of the most significant events and movements in the history of transnational cinema
3. Introduce aesthetic, historical, cultural and political aspects of cinema and its mainstream and alternative histories in order to understand the medium as mass-culture as well as an experimental one

Learning Outcomes

The students are expected to have the ability to:

1. Read film as a complex cultural/political/aesthetic text
2. Explore global film histories and (re)locate the cultural-cinematic history of the Indian nation-state within it
3. Develop acquaintance with concepts, theories and modes of writing on cinema, exploring English as well as non-English sources (in translation)

Contents

Introducing Cinema as an art form, early cinema, apparatus, sound and colour: Basic aspects of cinema and its history since the silent era

Film movements, auteur, genre: Case studies (the Italian Neo-Realism/the French New Wave for movement, Western/Gangster/Film Noir as genre, Ray/Ghatak as auteur)

Film criticism and cinematic writing: Criticism workshops, modes of writing (mimetic etc.), exploration of reading strategies

Many Histories of Indian Cinemas: Histories of Bombay cinema and the city of Mumbai, Indian arthouse, fans, stars and cine-politics in South Indian cinemas

The 'other' continents: Case studies (Latin American cinemas as a case study, with explorations of cinemas from Brazil and/or Argentina)

Cinema and the Contemporary: The Age of the Digital, digital cinema and cinephilia, the transitional phase from the celluloid to the digital, copyright and piracy, introduction to new media theories, the changing exhibition space, audio-visual essays

Title	**Dalit Movement and Literature**	Number	HSL7xx0
Department	HSS	L-T-P [C]	3-0-0
Offered for	UG and PhD	Type	Elective
Prerequisite	None		

Objectives

The instructor will:

1. Help students to explore the intricacies of concepts such as nation and nationalism, caste, caste oppression, and caste as an exercise of power
2. Help students to become familiar with theorizations on dalits and untouchability, alternative/non-normative histories of nation, literature and culture
3. Make students familiar with the vast corpus of dalit literature that challenges the hierarchical mode of existing, standard-received histories of Indian literature

Learning Outcomes

The students are expected to have the ability to:

1. Develop a basic engagement with dalit movements, histories and literatures
2. Develop alternative ways and modes of reading existing literary and cultural histories
3. Develop a theoretically nuanced understanding of 'difference' and 'exceptionalism' in the literature of the oppressed

Contents

Introducing the Dalit: Dalit as opposed to 'Harijan', Reading Ambedkar, Phule and others, critique of the Gandhian thought on the lower-caste, the Gandhi-Ambedkar debate (10 lectures)

The Old and the New: Critique of the more traditional schools of dalit criticism such as the works of D. R. Nagaraj and others, reading histories of movements such as the dalit panther and their manifesto, philosophical exploration of untouchability as manifested in Aniket Jaaware's works (10 lectures)

Literatures and Challenges: Dalit modernity, dalits in and after the 1990s, dalit autobiographies, challenging the canonical literatures, identity politics and writing (10 lectures)

Literary instances: Dalit writings from Eastern India (Adwaita Mallabarman), Western India (Marathi writings of Baburao Bagul, Sharankumar Limbale), and Southern India (G. Kalyana Rao, Challapalli Swaroopa Rani, B. Krishnappa, Siddalingaiah, Devanoora Mahadeva, Bama,
C. Ayyappan et al.) (12 lectures)

Title	**Cine-Politics under the National Emergency**	Number	HSL7330
Department	HSS	L-T-P [C]	3-0-0 [3]
Offered for	UG and PhD	Type	Elective
Prerequisite	None		

Objectives

The instructor will:

1. Help students to explore the intricacies of cultural forms and practices in the larger context of the political lives of the Indian nation
2. Help students to become familiar with some of the most significant events in the history of post-independence India through the prism of film history and state policy
3. Make students familiar with conceptual apparatuses in cinema studies and with the overlaps between political and cultural histories

Learning Outcomes

The students are expected to have the ability to:

1. Read archival and other materials that are relevant for history-writing
2. Explore associations between public institutions, national history, mass and avant-garde culture and the ever-changing socio-politico-cultural dynamics
3. Develop acquaintance with contemporary scholarly writings on Indian history, cinema and politics

Contents

Introducing Emergency and its Politics: The National Emergency, historical trajectory, relevance in Indian politics, literature review

Cinema, Cine-Politics and Cultural Politics: Defining Cine-Politics, Nation-Industry negotiations, carrying out cine-archival research, reading of film industry and film society materials/publications, review of relevant theoretical schools in Indian cinema studies

Sponsorship and Censorship: The Indian New Wave and Other Cinemas, censorship, Prime Minister's 20-point program, role of I&B ministry, industrial responses, Indian New Wave and state-sponsored cinema in the 1970s, debates on state sponsorship and film economy

Globalization of the Dictatorial in the 1970s: Digital Remembering, the idea of the dictatorial, ideological associations between global dictatorial regimes, cine-cultural evidence and responses, archiving of evidence in the days of the digital, conclusion

Textbooks

Title	**Perspectives in Language and Literary Studies**	Number	DHL6010
Department	IDRP: DH	L-T-P-D [C]	3-0-0-1 [4]
Offered for	M.Sc. DH First Year only; B.Tech Electives; B.Tech Minor in DH	Type	Compulsory for DH and Elective for all others
Prerequisite	None		

Objectives

The Instructor will:

1. Introduce students to theories of literature.
2. Introduce students to basic theories of language, linguistics concepts, and literary cultures in translation.
3. Provide the students with a background in the development of computational tools for literary analysis

Learning Outcomes

The students are expected to have the ability to:

1. Understand major trajectories in literary thought, trace the evolution of literary genres, and contextualize their contemporary significance.
2. Understand fundamental aspects of language and linguistic analysis.
3. Critically analyse literary texts using digital tools.

Contents

History of English Language and Literature: Literary Canon, Historical Events and Linguistic Shifts, Impact of technology on evolution of literature (5 lectures)

Literary Genres: The Epic, Drama, The Advent of the Novel, Poetry (6 lectures)

Literary Analysis and Criticism: Formalism, Close Reading and Textual Analysis, Structure, pattern, motif and metaphor analysis (5 lectures)

Fundamentals of Linguistics: Language Families, Syntax, Morphology, Phonology, Pragmatics (5 lectures)

Applied Linguistics: Theories of Language and Language Learning, Corpus and Discourse Analysis, Digital Tools for Language Learning and Textual Analysis (5 lectures)

Literary Cultures around the World: American Literature, World Literature, Literatures of the Commonwealth, Postcolonial and New Writing, South Asian Literatures (10 lectures)

Literature in the Digital Age: Cyberpunk fiction, Steampunk fiction, Science fiction, Digital Humanities Tools for Literary Analysis, Discourse and Corpus Analysis with Digital Tools, Data driven Literary Analysis (6 lectures)

Textbooks

1. Terry Eagleton. 1983. *Literary Theory: An Introduction.* Minneapolis: University of Minnesota Press.

2. Abrams, M.H. *A Glossary of Literary Terms.* Cengage,2013.

3. Barry, Peter. *Beginning Theory: An Introduction to Literary and Cultural Theory.* Manchester University Press, 2002.

Title	**Introduction to Editing and Publishing**	Number	**HS7XX**
Department	HSS	L-T-P [C]	3-0-0[3]
Offered for	UG and PhD	Type	Elective
Prerequisite	None		

Objectives
The instructor will:
1. Provide an overview of a modern publishing industry, its history, and its various processes with special focus on the roles of editors
2. Equip the students with the practical skills and knowledge required to enter this industry

Learning Outcomes
Students are expected to have the ability to:
1. Perform the skills of basic editing and publishing as editors while also acquiring the knowledge of the language and tools of editing
2. Know and understand the processes of the industry that will prepare them for employability

Contents
Part 1: Overview
1. History of publishing (2 lectures)
2. Various kinds of publishing (2 lectures)
3. Structure and processes of and opportunities in a publishing house (2 lectures)
4. What is editing and what are the roles of an editor (2 lectures)
5. Difference between editing, copyediting, and proofreading (1 lectures)
6. The future of editing: online editing and its opportunities (1 lecture)
Part 2: Understanding the editorial process
1. Commissioning manuscripts (1 lecture)
2. Working with writers (1 lecture)
3. Pre-editing or formatting (1 lecture)
2. Copyediting (1 lecture)
3. Proofreading (1 lecture)
4. Language of editing: The editing markups and style guides (2 lectures)
5. Tools of editing: Grammar and its various components (3 lectures)
Part 3: The practice of editing
Practical sessions on different forms of editing and stages of the editorial process on different media:
1. Citations (print and electronic)
2. Hard-copy editing and editing on the screen
3. Working with MS Word
(12 lectures)
Part 4: Interaction with industry experts with focus on ethical and legal issues
This may be in the form of internship opportunities, workshops, field visits, or guest lectures (10 lectures)

Title	**Indian Cinemas: Many Histories**	Number	**HSL7XX**
Department	HSS	L-T-P [C]	3-0-0 [3]
Offered for	UG and PhD	Type	Elective
Prerequisite	None		

Objectives

The instructor will:

1. Help students in exploring the intricacies of historiography in general and film historiography in particular
2. Help students to become familiar with some of the most significant schools and modes of film history-writing in the context of India and its many cine-cultural industries
3. Make students familiar with conceptual apparatuses in film history and their overlaps with national and global political and cultural histories

Learning Outcomes

The students are expected to have the ability to:

1. Engage with complex discursive formulations in historiography
2. Explore associations between multiple histories of a specific site of inquiry
3. Develop acquaintance with contemporary scholarly writings on Indian film history, politics and cultural formations

Contents

What is Film History?: Readings on film history, many histories, historiographies, history-writing methods, contemporary history (4 lectures)
Colonial Histories: Priya Jaikumar's work on empire cinema, Lee Grieveson's anthology on empire cinema (2 lectures)
National Histories: Sumita S. Chakravarty's work on Indian cinema and the nation-state (2 lectures)
Ideological Histories: M. Madhava Prasad's Marxist-ideological study, history of ideas and their textual-cinematic evidences (2 lectures)
Institutional Histories: Peter Sutoris' work on the Films Division, Sudha Tiwari's articles on FFC/NFDC, histories of the film society movement (2 lectures)
The Biographical-Historical: M. S. S. Pandian's work on M. G. Ramchandran, Theodore Baskaran's biography of Sivaji Ganesan (1 lecture)
Economic History: Ashish Rajadhyaksha on Bombay industry's illegitimacy, the underbelly of the city and its economy (2 lectures)
History of Exhibition: S. V. Srinivas' article on cinema hall and its public in South India, Adrian Athique on multiplex and the changing viewing practices (2 lectures)
Global History: Ravi S. Vasudevan on global histories of Indian cinema, transnational cinema as method, Sudha Rajagopalan on the reception of Bombay cinema in the USSR, Nitin Govil's narratives of encounter between Hollywood and Bombay (4 lectures)
The Anthropological/Ethnographic: S. V. Srinivas on stardom, fan club and ethnographic research in Andhra Pradesh, Uma Bhrugubanda's anthropological research on the citizen-devotee, Anand Pandian's anthropological research on Tamil cinema (8 lectures)
Genre Histories: Meheli Sen and Kartik Nair's works on Indian horror films, Darshana Sreedhar Mini and Ratheesh Radhakrishnan on soft porn in South India/Kerala (3 lectures)
Corporeal Histories: Usha Iyer's recent work on dancing women, Meheli Sen & Anustup Basu's edited book on figurations in Indian film (2 lectures)
Spatial Historiography: Priya Jaikumar's recent work on India as filmed space, Kaushik Bhaumik's dissertation on Bombay's urban history and cinema, Ranjani Mazumdar's work on Bombay cinema and the city (8 lectures)

Title	**Introduction to Literatures from India's Northeast**	Number	**HSL7440**
Department	HSS	L-T-P [C]	3-0-0[3]
Offered for	UG and PhD	Type	Elective
Prerequisite	None		

Objectives

The instructor will:

1. Introduce select texts from all eight states in India's Northeast
2. Explain the context of each text
3. Focus primarily on novels, poems, and short stories with the exception of one song-text (to be read as a poem)

Learning Outcomes

The students are expected to have the ability to:

1. Identify and understand at least one literary and one thematic issue from each text
2. Know about the heterogeneity of this forcefully homogenized and 'invented' region

Contents

Before We Begin: Understanding the Contexts

1. History of state formation: 'Invented' homogeneity and partition (3 lectures)
2. Culture of violence: 'Disturbed' area, AFSPA, nation and nationalism (2 lectures)
3. Introducing the eight states (1 lectures)

Starting Out with the Texts

1. Mamang Dai's *The Legends of Pensam*: The language question: the writer and her readers; Ecocritical concern through the Adi worldview (5 lectures)
2. Indira Goswami's *Pages Stained with Blood*: The writer and the translation; The 1984 anti-Sikhs riots through an Assamese's eyes (5 lectures)
3. 'Miyah'/'Miya' Poetry: Hafiz Ahmed's "Write Down 'I am a Miyah'": The writer and his new language of protest; NRC and the 'Na-Asamiya Muslims' (2 lectures)
4. Mufidun Nisa's "Wait, Flower, Don't Bloom": A Pangal writer in Manipur (Meitei) literary circle; The Meitei-Pangal clash of 1993 in Manipur (2 lectures)
5. Kshetrimayum Subadani's "The Heat and the Agony": ILP and the migrant workers in Manipur (2 lectures)
6. Esther Syiem's *Memoir in Water: Speaks the Wah Umkhrah*: Oral culture in Syiem; Khasi matrilineal society (5 lectures)
7. Rokunga's "*Ro Min Relsak Ang Che* (*Aw nang kan Lal kan Pathian*)": Mizo national consciousness in songs (2 lectures)
8. Mona Zote's "An Impression of Being Alive": The Korean influence in Mizo writing (2 lectures)
9. Temsula Ao's "The Jungle Major" from *These Hills Call Home: Stories from a War Zone*: Narrating the collective; The Naga conflict (2 lectures)
10. Rajendra Bhandari's *Kshar/Akshar* ("Perishable/Imperishable"): Nepali poetry of Sikkim; Ponderings on the 'global in Gangtok' (2 lectures)
11. Yishey Doma's *Legends of the Lepchas: Folk Tales from Sikkim*: Agriculture/farming in Lepcha folktales (2 lectures)
12. Shefali Debbarma's "Lamination": Kokborok writing of Tripura; Identity politics: The dress and the Schedule Tribe (ST) card (2 lectures)

Explorations: A Step Further (along with Starting Out with the Texts)

1. Author-centric criticism
2. Reader-centric criticism
3. Text-centric criticism
4. Context-centric criticism

Textbook

As mentioned in *Starting Out with the Texts*

Title	**Introduction to Contemporary Arts**	Number	HS 4XX
Department	HSS	L-T-P [C]	3-0-0 [3]
Offered for	UG and PhD	Type	Elective
Prerequisite	None		

Objectives
The instructor will:
1. Introduce the world of visual art through a sneak peek into art histories and movements in India and in the world
2. Train the students to develop an eye for interpreting and understanding visual experiences and representations

Learning Outcomes
The students are expected to have the ability to:
1. Appreciate different forms of creative and visual arts
2. Map histories of art movements in India and in the world
3. Understand and appreciate the aesthetic and philosophical aspects of visual representations

Contents
Introduction to visual arts with a focus on contemporary arts: Art, artwork, artworld (2 lectures)

Pre-'modern' precedents:
Art history and major art movements in the world (from classical to modern) (1 lecture)
Histories of ancient and medieval Indian art: Styles of Mughal, Rajput, Pahari, and Southern India (1 lecture)
Renaissance perspective and Indian resistance (1 lecture)

Major 'modern' Indian artists and art groups:
Colonized nation: Ravi Varma and the Bengal School; Amrita Sher-Gill and Indian modernist art; Rabindranath Tagore/Jamini Roy and Primitivism (6 lectures)
Making (of) the nation: The Bombay artist: M F Hussain; Lahore art circle: Zubeida Agha; Bangladesh Shilpakala Academy: Zainul Abedin (6 lectures)
Contesting (the) nation: Sudhir Patwardhan; Bikash Bhattacharjee's hyper-realism; Khakhar's 'Pop' art; Nalini Malani; Rokeya Sultana; Amruta Patil; Laishram Meena Devi (14 lectures)
Representing the regions (of the nation):
Folk art forms: Warli, Patachitra or Pattachitra, Kalamkari, Phad painting; Kalam (Kalamezhuthu); Tanjore painting; Madhubani painting (7 lectures)

New modes of representation:
Conceptual and performance arts (1 lecture)
Experimental cinema (1 lecture)
Installation art (1 lecture)
New modes of exhibition: Digital art and exhibition (1 lecture)

Title	**Introduction to Performance Studies in India**	Number	HS 7XX
Department	HSS	L-T-P [C]	3-0-0 [3]
Offered for	UG and PhD	Type	Elective
Prerequisite	None		

Objectives

The instructor will:

1. Introduce critical theoretical terms associated with performance studies in India
2. Provide an overview of various folk performative traditions in India
3. Explore the 'political' dimensions of these traditions

Learning Outcomes

The students are expected to have the ability to:

1. Understand the difference between key theatrical terms in performance studies and aesthetics in the Indian context
2. Identify and know major moments in the history of performance linking various theatrical traditions with their unique practitioners
3. Get acquainted with the 'politics' of theatrical performance and aesthetics in India

Contents

Introduction to performance: Drama, script, theater/theatricality, performance/performativity, mimesis, presence, and materiality (2 lectures)

Performance theories: Richard Schechner, Aparna Dhareshwar, Rustom Barucha, Erika Fischer-Lichte, and Marvin Carlson (5 lectures)

Performance histories: In India and in the world (2 lectures)

Traditions from the 'other' of India:

Aristotle's *Poetics*: The notion of the 'plot' (2 lectures)

Brechtian 'narration' versus Aristotelian 'plot/action': Bertolt Brecht as background to 'political' performance practices (2 lectures)

The Indian experiences:

Bharata's *Natya Shastra* and Kalidas's *Abhigyan Shakuntalam* with focus on the rasa theory (*abhinaya* vs *vritti*) (3 lectures)

Indian folk experiments: Utpal Dutt and Jatra, Habib Tanvir and Chhattisgarhi nacha, Girish Karnad and Yakshagana, Vijay Tendulkar and tamasha; Kathputli: the puppetry theatre of Rajasthan; Bhand Pather: the folk theatre of Kashmir; Ratan Thiyam and performing the spectacle of the theatre of the root; Lai Haraoba festival of Manipur (16 lectures)

The 'other' interventions: Binodini Dasi (performance in cinema), Manjula Padmanabhan's *Harvest* and performance in/and the posthuman world; Heisnam Sabitri in Heisnam Kanhailal's *Draupadi* (bodily performance), Swar Thounaojam and *Bogey Systems* (in English, Meiteilon, Kannada, and Tamil), and Mangai's *Frozen Fire* and performing queer (10 lectures)

Online Course Material

1. Introduction to Modern Indian Drama by Dr. Kiran Keshavamurthy, IIT Guwahati, at https://onlinecourses.nptel.ac.in/noc20_hs34/preview

Title	**Asian American Literature**	Number	HSL7XXX
Department	HSS	L-T-P [C]	3-0-0[3]
Offered for	UG and PhD	Type	Elective
Prerequisite	None		

Objectives:
The Instructor will:
1. Introduce students to the literary field of Asian American literature.
2. Look into three kinds of prose narratives, namely, immigration narratives, narratives of second-generation identity construction, and narratives emphasizing global or postcolonial perspectives.
3. Demonstrate the dynamic relationship between Asian American literature and the histories of Asians in the US.
4. Provide insights into settlement histories of the ethnic communities, legal discourses of immigration, multiracial hierarchy, multiculturalism, and neocolonialism in the US.

Learning Outcomes:
The students are expected to have the ability to:
1. Understand how the standard racial categorization of Asian Americans belies their vastly different languages, histories and traditions in the US.
2. Identify the challenges that Asian Americans encounter while undergoing the transition from "Asian" to "Asian American."
3. Explore how Asian American literature can function as a political and racial agency in critiquing America-centrism and racial inequality in the US.

Contents:
Introducing the genre: Emergence of the category "Asian American", Arrival of early immigrants specifically from East Asia (China, Korea, and Japan) and the Philippines, The later addition of groups from Southeast Asia, South Asia, and West Asia, Asian Americans disowning immigrants from other parts of Asia, Immigration policy of the US, Exclusion and deportation, Naturalization of Asians. (7 lectures)
Close Textual Readings and Conversations: Maxine Hong Kingston (5 Lectures), Amy Tan (5 Lectures), Bharati Mukherjee (5 Lectures), Jhumpa Lahiri (5 Lectures), John Okada (5 Lectures), Chang-Rae Lee (5 Lectures), Le Thi Diem Thuy (5 Lectures)

Textbooks
1. Maxine Hong Kingston's *The Woman Warrior*
2. Amy Tan's *The Joy Luck Club/ The Kitchen God's Wife/ The Hundred Secret Senses*
3. Bharati Mukherjee's *Jasmine/ Wife/ The Middleman and Other Stories/ Holder of the World*
4. Jhumpa Lahiri's *The Namesake/ Unaccustomed Earth/ Interpreter of Maladies*
5. John Okada's *No-No Boy*
6. Chang-Rae Lee's *Native Speaker*
7. Le Thi Diem Thuy's *The Gangster We Are All Looking For*

Title	**World Literature and Global Cinema**	Number	**HSL7XX**
Department	HSS	L-T-P [C]	3-0-0 [3]
Offered for	UG	Type	Elective
Prerequisite	None		

Objectives

The instructor will:

1. Help students to explore the intricacies of concepts such as world literature/*weltliteratur*, national, transnational and/or global within the disciplines of literary and cinema studies
2. Help students to become familiar with some of the most significant phenomena in the history of post-globalization cinema
3. Make students familiar with the emergent categories such as slow cinema and discuss their efficacy as global concepts

Learning Outcomes

The students are expected to have the ability to:

1. Map the trajectory from the national to the transnational conceptually, culturally and politically
2. Explore the methodological paradigm shift that the rise of transnationalism entails in various humanities disciplines
3. Develop acquaintance with contemporary research on transnationalism and cinema and consider the possibility of using transnationalism as a research method

Contents

Introducing world literature: Weltliteratur, the term borrowed from Goethe, the Franco Moretti intervention, literary mapping (10 lectures)

World Literature and Its Complexities: Contemporary comparative literature dealing with the concept, works of Emily Apter and Pascale Casanova, world history of literature (10 lectures)

Cinema and the Transnational: National cinema, the nation-state paradigm and its limitations, world cinema/transnational cinema and the interchangeability, the transnational waves (10 lectures)

Contemporary Categories: Transnational as method, slow cinema and its discontents, correspondences/filmed letters of contemporary filmmakers (12 lectures)

Textbooks

1. Casanova, P., (2004), *The World Republic of Letters*, Harvard University Press.
2. Goodwin, J., and Holbo, J., (eds.) (2011), Reading Graphs, Maps, Trees: Responses to Franco Moretti, Parlor Press.

Title	**Globalization and Culture**	Number	HSL4xx
Department	HSS	L-T-P [C]	3-0-0 [3]
Offered for	UG	Type	Elective
Prerequisite	None		

Objectives

The Instructor will:

1. Introduce students to varied definitions of globalization including its nature, dynamics and consequences as well as its multiple expressions in various periods in history.
2. Examine the cultural dimensions of globalization through global institutions, global flows, and the circulation of commodities, ideas and practices.
3. Explore the rise of religious, social, nationalist and populist movements across the world that challenge/supplement globalization.

Learning Outcomes

The students are expected to have the ability to:

1. Understand globalization as a historical and cultural phenomenon.
2. Apply theories and concepts in the study of globalization towards the understanding of specific cultural forms and their implications for economic and scientific development.

3. Critically engage with the proponents and dissidents of globalization and how they relate to our contemporary times.

Contents

When was Globalization: Globalization in History, Defining Globalization, Global-Local distinctions
Globalization and Culture: Neoliberalism, Cultural homogenization, Rise of common cosmopolitan cultures, McDonaldization
Global Flows: Circulation of cultural forms, commodities and practices (music, fashion, gaming, language, tourism and popular culture, innovation, scientific collaboration etc.)
Globalization and its Discontents: The rise of populism, consumer citizenship, local and slow food movements, Anti-globalization movements

Textbooks

1. Steger, M., (2017). *Globalization: A very short introduction,* Oxford University Press.
2. Barber, B., (1995). *Jihad versus Mcworld*, Times Books.
3. Stearns, P., *Globalization in World History,* Routledge.

Title	**Sociology of Science and Technology**	Number	**HSL7XX**
Department	HSS	L-T-P [C]	3-0-0 [3]
Offered for	UG	Type	Elective
Prerequisite	None		

Objectives

1. To help students conceptualize science and technology as embedded in culture, politics and sociality and understand how technical knowledge is produced in society.
2. To help students explore the dynamic relationship between technology and society and discover how technology and society influence each other.
3. To make students conversant with important and new concepts in science and technology studies in social anthropology.

Learning Outcomes

The students are expected to have the ability to:

1. Comprehend technological progress as a social process
2. Find connections between science, technology and culture and think beyond simple binaries like 'natural' and 'social' sciences and 'nature' and 'culture'.
3. Develop sensitivity towards an inclusive, sustainable use of technology and appreciate the significance of diversity in science studies

Contents

Introduction to the Sociology of Science – Introduction to the subject, its founding concepts and traditions, methods of doing STS studies, History of Science and its philosophical traditions – logical positivism, falsification and its critique (6 lectures)

Methodology of Science and its social connections - Structure of scientific revolutions, Ethics and ethos in science and deviance in practice of science, the Matthew Effect, and practicing 'agnostic' science, scientific inventions as cultural capital, social life of scientists. (10 lectures)

Social Construction of Science - Methods of representation in science, Ethnography of a laboratory, social construction of 'realities', social construction of nature, Effect of social understanding of race and gender on production of scientific knowledge (10 lectures)

STS as Social Science **–** Actor Network theory, Pasteurization and the world of non-humans, influence of science studies on social sciences, ecological understanding of the world, towards an inclusive understanding of the universe through STS. (10 lectures)

Science and Technology in India - Science & Technology in Colonial India, Development of Indian Science, Science and Governance in India (6 lectures)

Textbooks

Title	**Culture, Art and Heritage**	Course No.	HS 321
Department	HSS	L-T-P[C]	3-0-0 [3]
Offered for	UG	Type	Elective
Pre-requisite	None		

Objectives: The Instructor will:

1. Make the course largely interdisciplinary in nature and draw on literature, history, heritage, film, cultural studies and technology in India and the world
2. Help the students in understanding the complex role of history and culture in the shaping of our societies and identities
3. Explore a large canvas of genres, from Indian mythology, cinema, theatre, protected monuments, historical movements, folk dance and heritage.

Learning Outcomes: The student is expected to

1. be exposed to the diverse traditions of India and the world
2. develop an awareness and interest in indigenous traditions, heritage and technologies
3. develop an understanding to create national consciousness as objects of literary and cultural analysis

Contents

Culture: Introduction: The concept of Culture, Historicity and Definitions, Culture and The Nation, Uses of History in Contemporary India, Identity and Culture, Popular Culture, Visual Culture

Heritage and Conservation: Built Heritage: Introduction, Structures and Conservation, Material and Architectures, Technology and Architecture, Restoration Architecture, Indian History and the role of Architecture and sculpture, Conservation and the role of Conservation Agencies, Natural Disasters and the role of Conservation.

Intangible Heritage: Arts – Performing Arts (Music and Dance forms), Fine Arts (Painting), Literature centering around Myths, Legends and Epic Traditions, Oral Traditions, Traditional knowledge systems, Craftsmanship.

Textbook

No specific material

Course Title	**Gender and Society**	Course No.	**HSL7360**
Department	HSS	Structure (L-T-P-C)	3-0-0 [3]
Offered for	UG and PhD	Type	Elective
Pre-requisite	None		

Objectives

1. To provide conceptual, sociological tools and skillset for critiquing binary and ahistorical conceptions of gender
2. To offer critical understanding of gender in a globalized, transnational world
3. To offer critical understanding of gender representations in media, visual cultures, and technology

Learning Outcomes

1. Critique binary and ahistorical conceptions of gender in society
2. Understand interrelatedness of local, global, and transnational contexts in shaping of gender Issues
3. Accept of shared responsibility for solving local and global experiences of gender inequality

Contents

Gender as social construction: Key concepts; Introductions; Historical and social constructions of gender (3 lectures); Gender in Colonial History (6 lectures)
Gender across geo-social scales - Politics of the body; Marriage and the Family; Gender and the Nation; Gender and Migration (6 lectures)
Feminisms - History and types of feminist movements; Transnational Feminisms (6 lectures)
Gender, Science, and Technology - History of gender in science and technology; Household technologies; Medical technologies; Communication technologies; Video Games (7 lectures)
Imagining and Representing Gender - Gender in Literature and Culture (3 lectures); Postcolonial Studies; Gender and "modernity" (4 lectures); Normativity, Subversions, and Queer Studies (4 lectures); Global Gender Politics (3 lectures)

Title	**Global Health**	Number	HSL 7XXX
Department	HSS	L-T-P [C]	3-0-0 [3]
Offered for	UG and PhD	Type	Elective
Prerequisite	None		

Objectives

1. To introduce basic concepts of global health, and its relevance globally, with special reference to lower and middle-income countries (LMICs).
2. To understand the various determinants of global health and policy options to address global public health issues.
3. To examine how medical technologies should be used to improve health in low and middle income countries.

Learning Outcomes

1. Understand basic concepts of global health and its relevance in policy making.
2. Analyse the role of various determinants on global health.
3. Understand the role of medical technologies in improving health.

Contents

Principles, Measurements, and Health-Development links: The principles and goals of global health; Health determinants, measurements and status of health globally; The global burden of diseases; Health, education, equity and economy (8 lectures).

Cross-Cutting Global Health Themes: Ethical and human rights concern in global health; Culture and health; Health systems (8 lectures).

Burden of Disease: The environment and health; diseases of poverty, Nutrition and global health; Women's health; Communicable and Non-communicable diseases; Mental health; injuries; case studies from South-East Asian countries (12 lectures).

Global Health Institutions: Role of WHO over the period of time; World Bank; UNICEF; USAID; European commissions (5 lectures).

Role of Technologies in Improving Global Health: Global health needs and contribution of technologies; Frugal technologies; Implementation and innovation in technology for health; Disruptive technologies for healthcare in high income countries; Equity and universal coverage of technology (7 lectures).

Title	**Health Policy, Systems, and Financing**	Number	HSL7XXX
Department	HSS	L-T-P [C]	3-0-0[3]
Offered for	UG and PhD	Type	Elective
Prerequisite	None		

Objectives

1. Introduce critical and comparative understanding of the theory and practice of health policy with special focus on India.
2. Facilitate students to understand components of health systems and its financing mechanism.
3. Introduce different national level secondary health data sets and its relevance in research and policy making.

Learning Outcomes

1. Realize the importance of health policy and how to define policy with special focus on India.
2. Have a brief overview of the evolution of Indians health policy since Independence.
3. Understand different components of health systems and its financing mechanism.
4. Identify available national level secondary datasets in the health sector and its relevance in research and policy making.

Contents

Making Health Policy: The health policy framework: context, process, and actors; power and policy process; the state and private sector in health policy; agenda setting; government and policy process; policy implementation and evaluation *(10 lectures)*.

Evolution of India's Health Policy: Bhore Committee-1946; National Health Policy-1983, 2002, and 2017; Alma Atta Declaration-1978; National Rural Health Mission-2005; Ayushman Bharat Yojana-2018 *(8 lectures).*

Understanding Health System: Service Delivery; health workforce; health information system; medical product; vaccines; and technology; Financing; leadership and governance *(7 lectures)*.

Healthcare financing: Health transition, diseases burden, and health expenditure pattern; collecting revenue, pooling risk, and purchasing services; risk pooling mechanism; external assistance for health; improving health outcome *(8 lectures)*.

National Level Secondary Health Data Sets: National Sample Survey; National Family Health Survey; Census; Longitudinal Aging Study in India *(8 lectures).*

Title	**History and Philosophy of Science**	Number	HSL7410
Department	HSS	L-T-P [C]	3-0-0 [3]
Offered for	UG	Type	Elective
Prerequisite	None		

Objectives

1. To introduce philosophical origins and foundations of science
2. To provide a deeper insight into the evolution of science and scientific methodology
3. To help students identifying the relationship between science, philosophy, and society

Learning Outcomes

1. Students will have a realistic and rational approach towards different conceptions of science
2. The course may make students capable to analyze manifold philosophical issues associated with recent advancement of sciences
3. The course will nurture the skill to think analytically and critically

Contents

Historical and Philosophical Foundations of Science: Reciprocal Relationship between Science and Philosophy; Search for the Truth: History of Philosophy, Science, and Philosophy of Science; Scientific Methodology; Possibility of Knowledge; Laws of Nature; Limits of the Tools; Human Reason and Experience; Historic Interpolation (8 lectures)

Major Philosophic (and Scientific) Concepts: Explanation; Causation; Evidence; Prediction; Probability; Determinism; Reduction; Generalization; Universals; Space and Time; Modeling and Simulation; Truth Value (12 lectures)

Major Debates: Availability of Objectivity and Possibility of Subjectivity; Truth Discovery and Truth Creation; Theory Choice; The Turn to the Best Explanation; Underdetermination of Theories by Evidence; Bayesianism; Empiricism; Essentialism; Explanation; Realism and Antirealism; Structure of Scientific Revolutions; Nature of Scientific Explanations; Truth and/or Consensus; Historical Approach; The Pragmatic View (12 lectures)

Central Issues in Life Sciences: Biological Laws and Theories of Causation; Teleology; Theory of Natural Selection; Leaps and Randomness; Complexity, Indeterminacy, and Directionality; Biological Reductionism and Determinism; Darwin and Darwinism; Genetic Interventions; Eugenics; Enhancement; Nature of Scientific Discourses (10 lectures)

Title	**Foundations of Sustainability**	Number	HSL4040
Department	HSS	L-T-P [C]	3-0-0 [3]
Offered for	UG and PhD	Type	Elective
Prerequisite	None		

Objectives

1. To help students seriously considering responsible uses of science and technology
2. To motivate students to examine critically the potential uses of technological knowledge and artifacts
3. To provide acquaintance with normative commitments of an engineer/technologist

Learning Outcomes

1. Students shall be competent to assess the idea of sustainability with regard to possible applications of technological skills
2. Intellectual skills of critical thinking, unbiased assessment, and constructive decision making shall be nurtured
3. Sensitivity towards global concern for a sustainable future shall be promoted

Contents

Technological and Ethical Rationality: Thinking Like an Engineer; Normativity of Science and Technology; Technological Imperatives and Social Imperatives; Sciences, Values, and Value of Sciences. (6 lectures)

The Idea of Sustainability: Emergence and Scope of Sustainability Science; Basic Principles of Sustainable Development; Report to the Club of Rome; UN Report; Concern for the Future; Evolutionary Roots of Environmental Problems (8 lectures)

Plausible Applications of Technologies and Sustainability Concerns: Recent Advancements in Technologies; Impacts on Life Forms and Ecology; Methods for and Approaches to Evaluating Susceptibility of Ecological Systems to Hazardous Chemicals; Global Pollution and Health Risks (8 lectures)

Technology, Risks, and Ethics: Perception of Risk; Social Benefits versus Technological Risk; Justifying Risk; Moral Acceptability of Risk; Rise of Risk and Decline of Politics; Role of International Cooperation (8 lectures)

Uncertainty, Assessment and Precautionary Principle: Precautionary Principle; Future Technologies; Ethics, Technological Development, and Uncertainty; Ethics in Technological Culture; Pragmatic Turn (12 lectures)

Title	**Climate Change and Society**	Number	HS 7xx
Department	HSS	L-T-P [C]	3-0-0 [3]
Offered for	UG and PhD	Type	Elective
Prerequisite	None		

Objectives: The Instructor will:
1. Introduce students to scientific technological, historical, social, economic, political, cultural and ethical aspects of climate change within India and globally.
2. Contextualize climate change in terms of global politics, technologies, policies, gender, aesthetics, activism, and the anthropocene.
3. Facilitate the student to understand trans-disciplinary trajectories and their role in the complex interactions between climate, actors, scales, government, technology, civil society, cultural/social structures.

Learning Outcomes: The students are expected to have the ability to:
1. Critically analyze contemporary debates and perspectives on climate change histories, policies, technologies, alternative voices and human responses.
2. Engage in respectful discussions, think creatively and critically to provide meaningful solutions to climate related issues.
3. Reflect upon and acknowledge one's moral and ethical obligations to the planet in the future.

Contents

Introduction to Climate Change (2 lectures)

Global Genres and Positions Genres: Pastoral, Wilderness, Dwelling, Apocalypse (2 Lectures)

Positions: Social Ecology, Spiritual Ecology, Scientific Conservation, Green Politics, Ecofeminism, Deep Ecology, Bioregionalism, Tinai, Chipko Movement (2 Lectures)

Gender and environment: Is Climate Change gender neutral (research & perspectives), Climate change through the lens of intersectionality, climate change impact on gender in context of water, gender and food security, gender and land rights and, gender and health (6 lectures)

Women Writing Nature: Rachel Carson, Terry Tempest Williams, Sunitha Narayan, Mahaswetha Devi and Ambai (5 lectures)

Eco-Cinema: An Inconvenient Truth, Chasing the Ice, Paan, Godavari, Before the Flood, The Day After Tomorrow (5 lectures)

Policy and Climate Change: Global and Indian perspectives and SDGs, climate smart agriculture, climate finance, climate change and conflict/violence, climate change-induced migration (climate refugees) and displacement, adaptation to climate change, climate and environmental justice (8 lectures)

Anthropocene or the Human Impact on Climate Change: Climate change and agriculture - a historical analysis in the Indian context, climate change and disasters, ocean and climate change (5 lectures)

Anthropocene and Climate Change Narratives: Amitav Ghosh – Great Derangement, Vandana Shiva – Water Wars, Cli-fi – Amitav Ghosh (Gun Island), Barbara Kingsolver (Flight Behaviour), SunithaNarain – Conflicts of Interest, Elizabeth Kolbert-The Sixth Extinction: AnUnnatural History, Donna Haraway – Tentacular Thinking: Anthropocene, Capitolocene and Chthulucene (6 lectures)

Text Book:
A handbook with all the study material will be given to the students. The course will also include a field trip.

Title	**Politics of Water Governance**	Number	HSL7420
Department	HSS	L-T-P [C]	3-0-0 [3]
Offered for	UG and PhD	Type	Elective
Prerequisite	None		

Objectives

The Instructor will:

1. Provide conceptual sociological critical understanding on water governance through global, national policies and geo-politics; and the multiple challenges faced by the societies to address water issues.
2. Introduce students/young engineers to examine technologies through the lens of sustainability question and understand how technologies impacts the environment, industries and local communities' livelihood through the case of water.
3. Facilitate the students to understand trans-disciplinary pathways to explore conceptual and empirical questions concerning water scarcity, technologies, water pollution, uncertainty/rights and access to water resources, and the cultural politics of water development.

Learning Outcomes

The students are expected to have the ability to:

1. Interpret the theories and concepts underlying multiple levels of water governance, and contemporary global water debates around SDGs from a local/regional perspective.
2. Reflect on the concepts of sustainability when developing technologies and analyze water nexus with livelihoods, technologies and pollution.
3. By the end of the course, students/young engineers will be able to understand the politics and the socio-economics of water pollution and the sustainability question of the technologies and its relation with water.

Contents

Water management across space and time: historical narrative (4 lectures)

Major paradigm shifts in water governance: groundwater governance; politics and socio-economics of water pollution, political ecology of water (5 lectures)

Water as wicked problem: water laws/regulations/policy in India, Water conflicts in India and South-Asia trans-boundary water conflicts (5 lectures)

Gender and water: engineering masculinities in water governance (3 lectures)

Water rights and water justice: global politics of water grabbing; new spaces for water justice (4 lectures)

Social scientific understanding of socio-technical systems: politics of dams; virtual water flow, cost-benefit analysis of technologies and the livelihoods surrounding water (5 lectures)

Foucauldian discourse analyses: new water standards and practices of multinational corporations (5 lectures)

Water-climate change: water-food security nexus, water-agriculture nexus, water-energy nexus (5 lectures)

Water centric SDGs: SDGs 2, 6, 14, India and UN (5 lectures)

Textbook: A handbook with all the study material will be given to the students. The course will also include a field trip.

Title	**Aesthetics**	Number	32208
Department	HSS	L-T-P [C]	3-0-0 [3]
Offered for	UG	Type	Elective
Prerequisite	None		

Objectives

1. Analysis of key philosophical attempts which address issues related to beauty and art
2. Explication of theoretical aspects related to the judgment of taste
3. Evaluation of issues in aesthetics related to design.

Learning Outcomes

1. Understand the nature and function of art with the help of theories in aesthetics
2. Understand the nature and function of beauty
3. Identify the role of aesthetics in design

Contents

The Nature of Beauty and Art: Plato and Aristotle: The *Symposium*, an analysis of beauty; Imitation and Inspiration: the common thread in all art forms; Aesthetic Independence: Aristotle's *Poetics* (10 lectures)

Kritik der Urteilskraft (*Critique of Judgment*)*:* Immanuel Kant, The *Critique of Aesthetic Judgment*: discussions on aesthetic experience and judgment; The 'beautiful': judgments on beauty and further interpretations. The 'Sublime': the power of reason over nature; 'Pleasure': intentionality in enjoyment (8 lectures)

Existentialist Perspectives*:* Nietzsche, the 'genius' and creativity; Life: the 'absurd' and human freedom in expressions of art; Existentialism and Art: the purpose of art in a meaningless world; Existentialist art and the 'audience': spectator's vantage point (8 lectures)

Feminist perspectives in Aesthetics**:** Feminism: a critique of traditional Western ideologies on art; The Body: in art, science and philosophy; Aesthetic Categories: the feminine lens; Aesthetics: in everyday life; Post- Modernism and Aesthetics; Post-Modern Art (8 lectures)

Aesthetics of Design*:* The Methodology, Functionality and Aesthetics: the importance of design; Factors in Design: culture, scope and use; Case Studies: industrial culture and design of products (8 lectures)

Reference Books

Title	**Bioethics**	Number	HSL4080
Department	HSS	L-T-P [C]	3–0–0 [3]
Offered for	UG	Type	Elective
Prerequisite	None		

Objectives

The course will:

1. Introduce and evaluate ethical issues concerning life
2. Assess manifold implications of recent advancements in life sciences and technology
3. Nurture the virtue of care for life and ecosystem

Learning Outcomes

Students are expected to have the ability to:

1. Understand the significance of responsible use of biosciences and biotechnology
2. Assess professional obligations
3. Develop an attitude of stewardship towards all forms of life.

Contents

The Tools for Ethical Assessment: Origin and Significance of Bioethics; Major Ethical Theories; Dominant Approaches; International Declarations

Bioethical Problems: Ethical Issues Concerning Human Life; The Right over Life; Life Saving Technologies at the Beginning and End of Life; Life Enhancing Technologies; Reproductive Assistance; Bioengineering; Allocation of Resources; Drug Experimentation; Risk Assessment; Genetic Technology

Professional Dilemmas: Care; Confidentiality; Truthfulness; Role of Conscience; Professional Competence; Compliance with Laws, Policies and Advanced Directives

Animals and Biosphere: Grounds of Animal Justice; Animal Experimentations; Harvesting Organs; Genetically Modified Animals and crops; Ecological Balance; Species Conservation; Holistic Development

Textbook

1. Beauchamp, T.L & Childress, J.F. (2001). *Principles of Biomedical Ethics*, 5th edition, Oxford University Press.

Title	**Consciousness**	Number	HS729
Department	HSS	L-T-P [C]	3-0-0 [3]
Offered for	UG and PhD	Type	Elective
Prerequisite	None		

Objectives
The Instructor will:
1. Help the student appreciate the problem of consciousness
2. Help the student realise how different approaches to the study of consciousness arise out of different philosophical assumptions

Learning Outcomes
1- Being able to understand how the problem of consciousness is significant in the overall task of explaining human cognitive capacity.
2- Being able to appreciate how insights from different approaches can be harnessed to build up an account of consciousness.

Lecture Modules/Contents:
The problem of Consciousness: Scientific and Philosophical Approaches to Consciousness
Consciousness as a biological phenomenon: Need for unified research programme, multi level explanation. Explanation in the biological sciences.
Major Theories of consciousness: Neural correlates, higher order thought theory, multiple drafts model, attention schema model. Illusionism about consciousness.
Different Types of Consciousness: access consciousness and phenomenal consciousness, altered states of consciousness.
Function of Consciousness: Consciousness as an epiphenomenon, global work space theory, panpsychism.
Binding and phenomenal unity of consciousness: binding problem, cognitive mechanisms of phenomenal unity, neural mechanisms of binding.
Evolution of consciousness, Self and Freewill.

Reference Books:
1. Revonsuo A(2009) *Inner Presence* MIT Press.
2. Baars, B.J. (1997). *In the Theater of Consciousness: The Workspace of the Mind*. NY: Oxford University Press.

4. Metzinger T(2009) The Ego Tunnell Basic Books

Title	**Principles of Psychology**	Number	HSL3010
Department	HSS	L-T-P [C]	3-0-0 [3]
Offered for	UG	Type	Elective
Prerequisite	None		

Objectives: The Instructor will:
1. Providing knowledge about psychological mechanisms involved in human behavior and governing principles.
2. Developing a basic understanding of Conscious state, emotional, cognitive and personality dynamics of human being and their behavior.
3. Understanding individual and group human behavior in social context.

Learning Outcomes: The students are expected to have the ability to:
1. Theoretical understanding of psychological functioning.
2. Experiential understanding of psychological explanation of human behavior.
3. Developing a scientific approach to understand own and others behavior and improve upon it.

Contents

Introduction: Root, Field, Goal, Methods, Misconceptions about Psychology
The Aware Mind: Consciousness, State of Consciousness
The Feeling Mind: Feeling, Expressing and Interpreting Emotion
The Thinking and Knowing Mind: Learning, Memory, Forgetting, Thinking, Intelligence
The Individual Mind: Personality, Seeking Selfhood: Self-concept, Personal Control, Mastery and Growth
The Connected Mind: Attitude, Attribution, Prejudice, Group Behavior
Psychology Today: Stress: Good or Bad, Success: Intelligence or More

Textbook

Title	**Basics of Leadership**	Number	HS411
Department	HSS	L-T-P [C]	3-0-0 [3]
Offered for	UG	Type	Elective
Prerequisite	None		

Objectives: The Instructor will:

1.Explain key differences and similarities between major leadership theories
2. Explain the relationship between leaders and followers and effectiveness of leadership
3. Combining theoretical and applicable principles to develop leadership implementation plan

Learning Outcomes: The students are expected to have the ability to:

1. Develop theoretical understanding for definitions, characteristics and skills of leadership
2. Develop skill to use leadership style suitable to situation and followers.
3. Realize one's potential and developing leadership skill

Contents

Introduction to Leadership: Definition and description, Old Psychology of Leadership, Current Psychology of Leadership, New Psychology of Leadership

Leaders and Followers: Definition and type, Leader-Follower interaction for Effective Leadership; Being in-group prototype, In-group champion, entrepreneur of identity, Inventor of identity

Gender and Leadership: Masculine and Feminine style of Leadership, Stereotype and Attitude associated

Power and Leadership: Source of Power, Type of Power, Ways to increase power, Influencing Tactics

Ethics and Leadership: Definition and Description, Ethical Failure, Does ethical behavior pay, Is ethical reasoning and ethics training important

Skills of Leadership: 8 Guidelines: Knowing-Doing Gap, 3 Rs: Reflecting (AIRing); Representing (Subcasing); Realizing (SMART and RITE), Avoiding Leadership Trap

Textbook

Title	**Life and Professional Skill Development**	Number	32205
Department	HSS	L-T-P [C]	3-0-0 [3]
Offered for	UG	Type	Elective
Prerequisite	None		

Objectives: The Instructor will:
1. Sensitizing towards the importance of individual's strengths and virtues for having satisfying and successful personal and professional life.
2. Theoretical understanding of Positive Psychology Approach.

Learning Outcomes: The students are expected to have the ability to:
1. Learning techniques for awareness, improvement and development of strength and skills.
2. Developing synthesis of abilities to think like a professional, perform like a professional and to think and act in a responsible and ethical manner that integrates across all three domains.

Contents

Individual Difference: Philosophical Basis, Cognition, Personality, Attitude, Attribution, Socialization

Life Skills: Self Awareness, Creative and Critical Thinking, Problem Solving, Decision Making, Emotional Intelligence, Assertiveness, Stress Management

Professional Skills: Leadership, Communication, Planning, Organizing, Supervision and Management, Teamwork, Delegation, Ethical Practices

Textbook No ready textbook is available, appropriate material will be provided.

Title	**Positive Psychology and Well-being**	Number	HSL4060
Department	HSS	L-T-P [C]	3-0-0 [3]
Offered for	UG	Type	Elective
Prerequisite	None		

Objectives: The Instructor will:

1. Introduce the field of Positive Psychology by covering major themes
2. Explain scientific findings and practical implications
3. Develop and understanding and appreciation of positive aspect of human psyche

Learning Outcomes: The students are expected to have the ability to:

1. Get a sense of inner working of self
2. Appreciate the application of this knowledge in the field of education, workplace, personal life, and policy
3. Develop understanding to use the practical application to live fuller and meaningful life

Contents

Development of science of Positive Psychology: Is there a negative Psychology; History and introduction of field; Reasons for the growth of the field, Application of Positive Psychology in the practice of education and health

Character strength and virtues: Identification and assessment; Wisdom as master virtue, Post-traumatic growth of strength and virtues

Flow and Mindfulness: Living in present; Definition and differences; Applications

Positive emotions: Positivity; Benefits and burdens of positivity; Application

Happiness: Definition and determinants; PERMA-pursuing happiness; Money and happiness; Meaning and happiness, Eastern and Western perspective

Well-being and flourishing: Types and paradox; Social and digital well-being; Living well vs. Flourishing: Perspectives and pillars, Cultural perspective

Textbook

Title	**Consumer Culture and Commodities**	Number	HS 7xx
Department	HSS	L-T-P [C]	3-0-0 [3]
Offered for	UG and PhD	Type	Elective
Prerequisite	None		

Objectives: The Instructor will:

1. Facilitate students to understand and critically investigate consumption in contemporary, urban life.
2. Acquaint students with theories that will help them locate consumption vis-à-vis sociocultural contexts, identities, and markets.
3. Elaborate key areas of consumption such as shopping spaces and experiences, domesticity, advertising, tourism and fashion using examples from the Indian context.

Learning Outcomes: The students are expected to have the ability to:

1. Understand major concepts and theories in consumption and consumer culture.
2. Investigate processes of consumption empirically in various aspects of contemporary life.
3. Understand key political and moral concerns around consumption regarding ecology, sustainability, and socio-economic class.

Contents

Understanding Consumption: Theories of consumption, mass consumption, commodity culture, consumerism (Daniel Miller, Clifford Geertz, Fredric Jameson)

Objects, Materials and Social Contexts: Theories of matter and materiality, thing theory, study of objects (Bill Brown, Mary Douglas, Arjun Appadurai, Jean Baudrillard, Tim Ingold)

Media and Consumerism: Advertising, consumption, liberalization, middle-class lifestyles, conspicuous consumption in the Indian context (William Mazzarella, Leela Fernandes, Osella and Osella, Ritty Lukose)

Textbooks

Title	**Civilizations, Cultures, and Technologies**	Number	DHL6XX0
Department	IDRP: DH	L-T-P [C]	3–0–0 [3]
Offered for	M.Sc. DH First Year only; B.Tech Electives; B.Tech Minor in DH	Type	Compulsory for DH and Elective for all others
Prerequisite	None		

Objectives

1. This course introduces students to important historical and sociocultural processes that have crafted technologies over time and across civilizations.
2. Recognize how technological developments are related to socio-cultural values and practices and understand the roots of current technological society(ies)

Learning Outcomes

1. Students will be able to appreciate that technology is not an isolated, literate enterprise, it rather produces structures, machines, processes, systems that impact and inflect societies and civilizations

Contents

1. What is Technology - History of Civilizations and role of technology (Classical and
2. Early Modern Philosophy); Narrative(s) of Progress; Industrial Revolution(s); Industry and Innovation; Culture of Invention
3. Revolution, Enlightenment and the Rise of Modern Science
4. Social Construction of Technology - Colonial Technology (Race, Gender, Sciences and Technology);
5. Communication, Transportation and the changing world
6. Diffusion of Technologies and transfer of technology globally
7. The Development of the Computer Industry; Rise of the Internet and Digital Society(ies)
8. Industrialization, Commodification and the Environment; Biotechnology
9. Future of Science and Technology in the society and their changing relationship

Textbook

1. Pacey, Arnold. *Technology in World Civilization*, 4th ed. Cambridge, MA: MIT Press, 2001.
2. Volti, Rudi, *Society and Technological Change*, 4th ed. New York: Worth Publishers, 2001

Self Learning Material

Digital Humanities Seminar Video Archive of the Open University, UK, http://www.open.ac.uk/arts/research/digital-humanities/videos

Title	**Images, Imaginations, and Digital Cultures**	Number	DHL6XX0
Department	IDRP: DH	L-T-P-D [C]	3–0–0-0 [3]
Offered for	M.Sc., M.Tech, B.Tech	Type	Elective
Prerequisite	None		

Objectives

1. To familiarise students with the process of seeing as a social construct to explore the ways we produce, identify, understand, and consume images by studying visual materials from different historical and cultural milieu
2. To introduce students to how photography and images across time and space change visual discourse and people's lives
3. By contextualising everyday visual culture within larger social debates around power, politics, identity and resistance, this course aims to create a consciousness about the communicative power of visual images, and to equip students with interpretive tools for the evaluation of images.

Learning Outcomes

1. Students will be able to develop a sociological imagination of visual cultures and its impact on society
2. Students will be able to assemble a multi-perspective analysis of a given sociocultural issue related to images against local, global, international, and intercultural background
3. Map historical photographic concepts to current digital references.

Content

1. Visual Cultures and the Process of 'Seeing': Subject-Object debate; The Spectacles of Modernity; Power, Knowledge and the Gaze (Imaging the 'Other') [10 Lectures]
2. Images as Performative Space [8 Lectures]
3. Visual Culture and Resistance - Representations, Culture, Media, and Markets [6 Lectures]
4. Digital media and Global Image (Visual Culture of Everyday Life) [10 Lectures]
5. Netnography/ Digital ethnography [8 Lectures]

References Books

Title	**Fundamentals of Digital Humanities**	Number	DHL7010
Department	IDRP-DH	L-T-P [C]	3-0-0 [3]
Offered for	B.Tech. (Cr>=100); M.Sc. (Cr >=30); M.Tech. (Cr.>0); Ph.D. (Cr.>0)	Type	Elective
Prerequisite	None		

Objectives

1. Introduce and explore a broad spectrum of perspectives on the Digital Humanities
2. Develop familiarity with a range of Digital Humanities projects, as well as the ability to evaluate the tools and methods involved in creating and analysing those projects
3. Critical and reflexive use of digital tools, technologies, and spaces by understanding that all technologies are complex and socially situated, through which humans make meaning

Learning Outcomes

1. Appreciate and critically discuss Digital Humanities projects in light of current methods and theoretical approaches to the field
2. Explain how Digital Humanities methods and practices are applied in different disciplines
3. Skillset to plan, develop, and evaluate a Digital Humanities research project

Fractal Course Contents

<u>Fractal 1: Digital Humanities: Emerging Contours (DHL7011)</u>

Introduction: What is Digital Humanities, Evolution of classical disciplines into Digital Humanities
Digital Cultural Heritage; Conceptualising DH projects; Interdisciplinary style of proposal writing [4 Lectures]
Computational Humanities [3 Lectures]
Digital Embodiment: Embodied Identities in Digital Society; Bias and Privilege – Marginalised Histories; Cyborgs, Gender, Space, and Place in Digital Societies [4 Lectures]
Literature and Technology, Text Analysis, Data Visualisation [3 Lectures]

Hands-on Exercises

1. Identifying DH projects from traditional projects: Concrete examples and a range of approaches to DH from the traditional disciplines.
2. Digital Humanities Project Critiques: Exploring the project goals, what type of data it used, how that data was found and/or transformed, what technologies were used, and why.

Title	**New Media Studies**	Number	DHL5XX0
Department	IDRP: DH	L-T-P [C]	3–0–2 [4]
Offered for	All M. Tech and PhD students <Shall also be considered for B.Tech Students>	Type	M.Sc. DH First Year Compulsory, Elective for all others
Prerequisite	None		

Objectives

1. Exploring the various possibilities offered by New Media and their impact on social, political and cultural domains
2. Understanding concepts such as piracy, rights and the digital commons
3. Understanding the implications of New Media and the digital image for the public lives in India

Learning Outcomes

1. A sustained interest in new media and its global politics
2. Informed acquaintance with the network society
3. A South Asian/Indian intervention into the field

Contents

New Media and its aftermath, public domain and the digital commons, copyright and IP, piracy, online streaming and ownership/authorship debates, network and cyber-culture, videogames, digital image and social media, media lab as research space, New Media in Indian politics

Reference Books

1. Athique, A, Parthasarathi, V., and Srinivas, S.V., (Eds.) (2018), *The Indian Media Economy*, New Delhi: Oxford University Press.

Title	**Digital Cinema**	Number	DHL5XX0
Department	IDRP: DH	L-T-P [C]	3–0–2 [4]
Offered for	All M. Tech and PhD students <Shall also be considered for B.Tech Students>	Type	M.Sc. DH First Year Compulsory, Elective for all others
Prerequisite	None		

Objectives

1. Exploring the various democratic possibilities offered by digital cinema
2. Understanding the digital in the domain of exhibition and spectatorship
3. Understanding the digital platforms for cinema-visual art collaboration

Learning Outcomes

1. A sustained interest in digital cinema, its liberating principles and politics
2. Informed acquaintance with the experimental cinema-visual art alliance in the days of the digital
3. The implications of the digital for non-industrial film forms

Contents

The end/future of celluloid, post-cinema, digital cinema and durational principles, streaming platforms and authorship debates, digital film archives and databases, experimental cinema, visual art, and the digital, new exhibition spaces, screen dynamics and high definition image, emergent forms of spectatorship

Reference Books

Title	**Network Cultures**	Number	**HSL 7xx**
Department	HSS	L-T-P [C]	3-0-0 [3]
Offered for	UG and PhD	Type	Elective
Prerequisite	None		

Objectives

The Instructor will:

1. Introduce students to the field of network cultures that revolves around the interaction between new forms of networked media technologies, its users and the developing discourses
2. Provide a critical understanding regarding the artistic, political and technical facets of the internet and other emergent media that will help students better understand the contemporary paradigms in the field of network studies.
3. Allow students to develop a self reflexive understanding and a critical approach to web-based and computational cultures, through exposure to divergent perspectives on data, governance and society especially in the historical, social, cultural and economic context of India.

Learning Outcomes

The students are expected to have the ability to:

1. To understand the broad field of network cultures as a strategic instrument to diagnose political and aesthetic implications of user-driven computer mediated communication.
2. Interpret the theories and concepts underlying the technical, economic, social aspects of the network, and put it in dialogue with its everyday manifestations
3. By the end of the course, students will develop the capacity to create rational frameworks for the varied contexts of internet mediated communication: including design, activism, art, philosophy, political theory, and urban studies

Contents

Historical background: Society, Modern Science, and Technology (4 lectures) Tracing a concise history of the development and teleology of network studies and network cultures by acknowledging relevant contributions from theorists including Aristotle, Kuhn, Fleck, Jassanof

Hierarchies v/s Networks (4 lectures) Locating the complex dynamics, similarities and differences between hierarchies and networks through works of scholars from diverse disciplines and locations such as Niall Feguson, Tim Berners Lee, David Berry, Alexander Galloway, and Sandeep Mertia

The Social, The Technological and its Overlaps (8 lectures) Situating the epistemic and ontological origins of networks in its social and technical contexts including the overlaps. Readings and case studies from Langdon Winner, Claude S. Fisher, David, J. Hess, Tarleton Gillespie, Alessandro Ludovico, Geert Lovink, and Gyan Prakash,

Networks and Networlds (4 lectures) Differentiating between networks and networlds;Communication paradigms, the power frameworks and counter power potentialities that are espoused in such networks and networlds. Readings and Case studies from Castells, Apprich, Dragona, Lovink, Wüst. Brevini, Pasquale and Mbembe *Algorithms, Big Data and Surveillance Capitalism in the Networked Age (8 lectures)* Analyzing Big Data, Open Data Algorithmic biases and Surveillance Capitalism within network societies. Readings and case studies from Gitelman, Boyd, Zuboff, Beer, Manovich, Driscoll and Walker)

*The Gender of Networks (4 lectures)*_Understanding the linkages, interactions and procesess through which gendered bodies and networks interact. Readings from Wajcman, Haraway, Cupples, and Bay

*Networks and New Becomings (6 lectures)*_Analyzing the anomalous objects and processes in digitally networked cultures and the new possibilities and challenges that they engender, especially in a post Covid 19 landscape. Readings and case studies from Parrika, Loes Bogers, Letizia Chiappini, Duncan J. Watts & Steven H. Strogatz , Stefania Milan, Emiliano Treré and Silvia Masiero, and The Alan Turing Institute*The Analog lives of Networked*

Digital Data in India (4 lectures) Afterlives of data and computational cultures in the context of the Global South, with a specific focus on India. Readings and Case studies Pankaj Sekhsaria, Navin Thayill, the Institute of Network Cultures and Akash Solanki

Textbook:

A curated course artifact with all the study material will be given to the students.

Title	**Masculinities in/and the Global South**	Number	**HSL 7xx**
Department	HSS	L-T-P [C]	3-0-0 [3]
Offered for	UG and PhD	Type	Elective
Prerequisite	None		

Objectives

The Instructor will:

1. Introduce students to the societal structures and expectations through which the gendered individual emerges as an integrated physiological, psychological, and socio-political being
2. Locate how the postcolonial nation state and masculine behaviours intersect in the Global South through in-depth case studies and analysis of policy reports as well as cultural artifacts related to current environments, health, family, relationships, and aging
3. Critically examine masculine expectations and behaviors in contemporary society, with a specific focus on India

Learning Outcomes

The students are expected to have the ability to:

1. To understand the broad field of Masculinity Studies and the construction of masculinities in sports, family, work and other social relationships

2. Examine the concepts underlying heteropatriarchal assumptions about masculinity and the various gendered experiences of the male body based in citizenship, caste, class, occupation, physical ability and sexuality

3. By the end of the course, students will develop the capacity to understand and develop rational frameworks for the varied contexts of hegemonic, hyper and hypo-masculinities in diverse social and professional contexts

Contents

The Phenomenology and Materiality of Bodies (6 lectures)*:*_Introduction to power, essence, embodiment and volatility in relation to gendered bodies through the works of Merleau-Ponty, Foucault, Irigaray, Cixous, de Beauvoir, Fuss and Grosz

*Gender and Performativity (8 lectures):*_Locating through the works of Butler, Halberstam, Bordo and Douglas how gendered behaviour and sexual identity differ, intersect and create dissonances based within the specificities of our geographical and social positions

Bodies, Spaces and Borders (6 lectures): Examine how gendered bodies are performed and determined within the determining variables of spatial contexts and bordered zones. Readings from Sara Ahmed, Mohanty, Hooper, De Certeau, Debord, Massey and Soja

Men, manhood and masculinities (12 lectures): Tracing the historical and social constructions of hegemonic, hypo and hypermasculinities in various local, regional and national contexts. Readings from Connell, Kimmel, Messerschimdt, Dasgupta, Gokulsingh, Kabesh, McRuer, Krishnaswamy, Sinha and Puar

Mediations, Violence and Manhood (6 lectures): Examining the intrinsic role of violence in the construction of dominant masculinities especially in postcolonial spaces and the role of the media in legitimizing such constructions of manhood. Readings and viewings from Klaus Thewleit, Jackson Katz, Eric Anderson, Sanjay Srivastava, Mike Donaldson, Jon Mckenzie and others

Digital masculinities and its Discontents (4 lectures): Deciphering how digital spaces configure new forms of masculinities and its effects on both online and offline spaces. Readings from Roy, Currier, Garlick, Chowdhury and others.

Textbook:

A curated course artifact with all the study material will be given to the students.

Additional Materials:

1. Fuss, Essentially Speaking
2. Grosz, Volatile Bodies
3. Hatty, Masculinities, Violence and Culture
4. Hooper, Manly State
5. Jarvis, The Male Body at War
6. Kimmel, Manhood in America
7. Lingis, Foreign Bodies
8. McKenzie, Perform or Else
9. Theweleit, Male Fantasies (Vol.2)

Title	**Energy Humanities**	Number	**HSL7XX**
Department	HSS	L-T-P [C]	3-0-0 [3]
Offered for	UG and PhD	Type	Elective
Prerequisite	None		

Objectives

The Instructor will:

1. Help students in exploring the intricacies of Energy Humanities and the social, political, and historical contexts which engender this interdisciplinary field
2. Make students familiar with the many modes, forms and practices from the humanities, social sciences and natural sciences that constitute the ontological and methodological underpinnings of the Energy Humanities
3. Help students to become familiar with some of the most significant events and issues that frame the key debates in the Energy Humanities

Learning Outcomes

The students are expected to have the ability to:

1. Critically read theoretical texts and public policy artifacts that are relevant to the framing of discourses of Energy Humanities
2. Understand associations between public institutions, national cultures, consumerism, and capitalist socio-politico-cultural dynamics that influence imaginaries of energy in contemporary culture
3. Develop acquaintance with contemporary scholarly writings on Energy Humanities

Contents

The Rise of Energy Humanities (8 lectures) *T*he emergence of "Energy humanities" as a rapidly emerging field of scholarship that overcomes traditional boundaries between the humanities and natural sciences and between academic and applied research; highlighting the essential contributions, insights and methods that the humanities can make to areas of study and analysis that were once limited and siloed within the natural sciences

Discourses around Energy Humanities (8 Lectures): Role of key sites of research on energy and culture—Comenius University in Bratislava (Slovakia), the Center for Energy and Environmental Research in the Human Sciences (CENHS) at Rice University and the Petrocultures Research Group at the University of Alberta—in developing discourses around Energy Humanities; social as well as environmental consequences of energy once it gets industrialized across the globe; exploring the history of energy use and energy transitions

Energy and Modernity (12 lectures): The self-reflexive relationship between energy, rationality modernity, and capitalist ecologies of development; Role of critical theory in the humanities and social sciences to formulate an effective critique of the multiple narratives of Western centric enlightenment narrative of modernity and discussing the diverse manifestations of this narrative within formulations of energy discourses; the progress and growth of Energy in the global North through colonialism and exploitation of the people and resources of the global South.

A Critical Theory of Energy in the Anthropocene: (10 lectures) The ways in which energy humanities interrogates systems and processes promulgated by an energy-focused society; Petromyopia; the need to reenvision the theoretical lexicon and applied vocabularies of history, politics, philosophy, literary and cultural studies and the need to add energy as a key variable for imagining inquiry into humanistic questions in the Age of the Anthropocene; understanding the ontological positions of dominant and minority socio-political subjects who inhabit energy landscapes

Energy Humanities and its Futures: (4 lectures): Locating the political and public discourse around key energy issues of the future and explore the role of energy within international relations; identify examples of best practices regarding climate change policy and how we can move toward solving our current energy and environmental dilemmas by making humanistic research a part of the conversation

Textbooks

A curated course artifact with all the study material will be given to the students

Course Title	**Theories of Intelligence**	Course No.	**CG4xx**
Department	Science of Intelligence	Structure (L-T-P [C])	3-0-0 [3]
Offered for	UG	Type	Elective
Prerequisite	None		

Objectives
1. The course will provide the introductory overview of the concept of Intelligence.
2. Acquainting the student to the historical significance, and practical implication.
3. Develop comprehensive understanding and scientific underpinning of concept of Intelligence.

Learning Outcomes
1. Develop scientific understanding of concept, measurement and application of intelligence.
2. Acquire Psychological explanation of Intelligence and apply it to other similar concepts.

Contents
Historical development and concept of Intelligence: *Origin of study of intelligence in Psychology; Defining Intelligence: Philosophical and Psychological; Language and intelligence; Biological, racial and cultural difference in Intelligence* (8 Lectures)
Theories of Intelligence: *Psychometric theories; cognitive theories; cognitive-contextual theories; and biological theories. (10 Lecture)*
Intelligence and related concepts*: Social Intelligence; Emotional Intelligence; System Intelligence, Personality and Intelligence, Emotion and Intelligence.* (8 Lectures)
Measurement of Intelligence*: Psychometric assessment; Psychophysiological assessment* (6 Lectures)
Contemporary issues related to Intelligence: Intelligence and performance link, Human Intelligence in the era of artificial intelligence, Beyond Intelligence: concept of practical intelligence and concept of Wisdom (10 Lectures)

Reference Book

Course Title	**Advanced Cognitive Processes**	Course No.	**CG4xx**
Department	Science of Intelligence	L-T-P [C]	3-0-0 [3]
Offered for	UG	Type	Elective
Prerequisite	None		

Objectives

1. The course will provide the introductory overview of the Cognitive processes.
2. Understand fundamental cognitive theories of attention, memory, executive function and decision-making.
3. Develop comprehensive understanding and scientific underpinning of relation of brain, mind, and behavior.

Learning Outcomes

1. Develop a knowledge base in cognitive Science and demonstrate familiarity with the major concepts, theoretical perspectives, empirical findings, and historical trends in cognitive Science.
2. Respect and use critical and creative thinking, skeptical inquiry, and the scientific approach to solve problems relating to mental processes.

Contents

Introduction: *Introduction to cognitive Processes and Cognition, Foundation of Cognitive Psychology, the architecture of the Mind* (4 Lectures)

Knowledge and Mental Imagery: *Concept formation, Different approach to Categorization, Semantic Network theory and model, Visual Imagery, Mental imagery, Cognitive Map, Schemas and Spatial cognition (5 Lecture)*

Metacognition and Memory*: Basic process of memory encoding storage and retrieval, Short term memory/working memory, long term memory, Models of Memory, context and encoding specificity, metacognition and memory strategies, and forgetting, Memory for action,* (5 Lectures)

Language : Language acquisition, Language Comprehension, Speech perception, Constituent structure, Language Production and reading, Codes switching and Second Language Proficiency, Multilingualism (8 Lecture)

Problem Solving and Creativity*: : Classification of problems; Newell and simon's Theory; Problem-solving Approaches, Nature and Measurement; Approaches to creativity, Factors affecting Creativity, Science of creative intelligence* (7 Lectures)

Reasoning and Decision making: Logical Reasoning and Decision Making, Theories of Thought processes; Decision making; Algorithms and Heuristics- representativeness, availability, anchoring and adjustment; Cognitive biases in decision making. (8 Lectures)

Cognition and Emotion : Quantifying Cognition and affect, Affect cognition relations in specific cognitive processes like perception, attention, memory and judgement, System Theory, Emotion regulation (5 Lectures)

Course Title	**Engineering Psychology**	Course No.	**HS 4XX**
Department	HSS	Structure (L-T-P [C])	3-0-0 [3]
Offered for	UG	Type	Elective
Prerequisite	None		

Objectives

The Instructor will:

1. The course will provide the introductory overview of the Human factor and Engineering Psychology.
2. This course will allow the students to recognize the integrated (systems) nature of Engineering Psychology, the centrality of human beings in systems design, and to use the topics covered and the available knowledge base to adapt the environment to people.

.

Learning Outcomes

The students are expected to have the ability to:

1. Identify human performance capacities and limitations in modern human-machine systems;
2. Develop a knowledge base in engineering Psychology and demonstrate familiarity with the major concepts, theoretical perspectives, empirical findings, and historical trends.
3. Respect and use critical and creative thinking, skeptical inquiry, and the scientific approach to solve problems relating to Human factor and engineering Psychology.

Contents

Module 1: Introduction to Engineering Psychology and Human Performance, Signal Detection Theory, Information Theory

Module 2: Theories of attention, Attention in Perception and Display Space, Spatial Displays Navigation and Interaction in Real and Virtual Environments**,** Multi-tasking

Module 3: Cognition, Memory and Training, Attention, Time-Sharing, and Workload , Selection of Action Manual Control, Stress and Human Error*, Social Factors,* Cognitive Offloading

Module 4: Decision making, normative and naturalistic decision-making models, Control Theory, and the Lens Model of Brunswick

Reference Book

1. Wickens, C. D., & Hollands, J. G. (2000). Engineering psychology and human performance (3rd Ed.). Upper Saddle River, NJ: Prentice-Hall.
2. Introduction to Human Factors Engineering (2nd Edition) by Christopher D. Wickens, John Lee, Yili D. Liu, Sallie Gordon-Becker, 2003.

Online Resource

2. Kathleen M Galotti, Cognitive Psychology in and out of the Laboratory. https://edge.sagepub.com/galotticogpsych6e/student-resources/chapter-9/video-and-multimedia

Course Title	**Cognitive Psychology**	Course No.	**HS 7XX**
Department	HSS	Structure (L-T-P [C])	3-0-0 [3]
Offered for	UG and PhD	Type	Elective
Prerequisite	None		

Objectives
The Instructor will:
1. To learn the different ways of conceptualizing the concept of Cognitive Psychology and cognition.
2. To understand the cognitive processes Underlying Human Behavior.
3. Since there is no universal approach to study all "Cognition", the present course will use a number of older and newer approaches for studying Cognition.

Learning Outcomes
The students are expected to have the ability to:
1. This course will provide tools that are needed to think critically about problems relating to cognition and Human Behavior.
2. The knowledge from the course will be useful in tackling everyday problems and attaining optimal solutions.
3. Knowledge about human cognitive systems can be used in designing sophisticated Artificial Intelligence (AI) systems that learn from mistakes and make our lives a lot easier to live.

Contents
Module 1: History, The cognitive Revolution, Philosophical issues, Theory and research in Human Cognition
Module 2: Object Perception and Recognition, Attention, Review of different approaches, automaticity , consciousness, awareness
Module 3: Human and Artificial Intelligence, *memory, visual and spatial memory, memory of general knowledge, concept formation*
Module 4: Language skills, thought process , Problem solving and creativity, *Reasoning and decision making*

Reference Book

Course Title	**Introduction to Cognitive Neuroscience**	Course No.	**HS 7XX**
Department	HSS	L-T-P [C]	3-0-0 [3]
Offered for	UG and PhD	Type	Elective
Prerequisite	None		

Objectives
The Instructor will:
1. To learn about the fundamentals of Neuroscience.
2. To understand the role of brain imaging in Neuroscience.

Learning Outcomes
The students are expected to have the ability to:
1. Demonstrate familiarity with basic anatomy and physiology of the Brain.
2. Explain how the brain allows us to do every day behaviour.
3. Understand the neuroanatomy, different functional aspect of brain and principles of signal processing in Brain.

Contents
Module 1: Introduction to cognitive Neuroscience, Neuroanatomy, Neuron, Action Potential, Sensory processing and motor systems
Module 2: Behavioural measure of Cognition, Neuroimaging Methods in Cognitive Neuroscience, EEG, fMRI
Module 3: Neural process of Attention, Vision, Language, motor control, Navigation, and Memory,
Module 4: LTP and Synapses, Value based decision making, Reinforcement Learning, Emotion and Social Cognition, Potential societal implication of Cognitive Neuroscience

Reference Book

sssCourse Title	**Introduction to Cultural Studies**	Course No.	**DHL7XX0**
Department	IDRP-DH	Structure (L-T-P-D [C])	3-0-0-0 [3]
Offered for	Ph.D. (Cr>=0); M.Sc. (Cr >=30); M.Tech. (Cr>=0); B.Tech. (Cr>=100)	Type	Elective
Prerequisite	None		

Objectives

1. Teach cultural studies as an interdisciplinary field which draws from and contributes to literature, media studies, cultural anthropology, and sociology amongst other disciplines.
2. Equip students with methods and frameworks to look at the central preoccupations of the field – identity, power, economy, culture, aesthetics, and social institutions.
3. Critically interrogate the benefits of cultural studies for both inter- and intra-disciplinary work.

Learning Outcomes

1. Understand major theories relating to historical and emergent ideas of culture and social thought.
2. Investigate processes of cultural production, consumption, and preservation using conceptual tools from the field of cultural studies.
3. Contextualize the role, applications, and significance of culture in the digital age.

Contents

Culture in the 19th and 20th centuries: The Emergence of the Culture Concept, Evolution of Culture, Culture and the Industrial Revolution (5 lectures), The Culture Industry (Value and Meaning), Culture as Commodity (Mass Culture) (5 lectures)

Culture and Politics: Aesthetics and Politics, National Culture, Cultural Semiotics and Political Life (5 lectures) Cultural Economy, Political Society (5 lectures)

Culture and Pedagogy: Culture and the Disciplines - Literary Studies, Anthropology, Sociology, History, Linguistics/Philology, Visuality Studies, Political Science (6 lectures), Understanding the Two Cultures - Natural and Human Sciences, Addressing the Pedagogical and Intellectual Divide (5 lectures)

Culture and Contemporary Life: Mapping the City, Urban Lives and Cultures (5 lectures), Knowledge Society, Technology, Precarity, Virtuality, Representation and Alternate Realities, Culture and Big Data (6 lectures)

Course Title	**Analysis of Social Media Networks**	Course No.	**DHL7XX0**
Department	IDRP-DH	L-T-P [C]	3-0-0 [3]
Offered for	Ph.D. (Cr>=0); M.Sc. (Cr >=30); M.Tech. (Cr>=0); B.Tech.(Cr>=100)	Type	Elective
Prerequisite	None	Anti-requisite	Social Networks, Social Network Analysis

Objectives

1. The course introduces social network analysis, its mathematical foundations, and analyzing tools (Pajek or NodeXL or UCINET or Others).
2. Students will be introduced to different types of online networks and how to use them to answer social, economic, and other queries.

Learning Outcomes

1. Students will be able to acquire social media data, formulate a hypothesis, and find an answer out of network data.

Contents

Introduction: Overview and Aspects of Networks, Ego Network, Characteristics of Social Networks. (3 Lectures)
Mathematical Foundation for Social Network Analysis: Graphs, Matrices. (4 Lectures)
Network Data: Sources, Sampling and bounding, Ethical considerations, and Collection Techniques. (4 Lectures)
Network Data Management: Data format, Import, Cleaning, Transformation, Export, Visualization (3 Lectures)
Information Diffusion Analysis: Centrality and Network Value, Influence, Epidemics Modeling (3 Lectures)
Clustering and Grouping: Community detection, election campaign analysis. (3 Lectures) *Networks in Their Surrounding Contexts*: Homophily, Affiliation, Behaviour Modeling (3 Lectures) *Markets and Strategic Interaction in Networks*: Network Models of Markets, Bargaining and Power in Networks, Sponsored Search Markets, Network Effects and Economy (5 Lectures)
Voting: Group Decision-Making, Information Aggregation (3 Lectures)
Case Studies: Wiki Networks, YouTube, Flickr, Twitter, Facebook, Email Communication Network, Thread Network (11 Lectures)

Text Books

Course Title	**Digital Storytelling**	Course No.	**DHL7XX0**
Department	IDRP-DH	Structure (L-T-P-D[C])	3-0-0-0 [3]
Offered for	Ph.D. (Cr>=0); M.Sc. (Cr >=30); M.Tech. (Cr>=0); B.Tech. (Cr>=100)	Type	Elective
Prerequisite	None		

Objectives

1. Understand and examine the new tenets of storytelling in the digital age through thoughtful analysis of trends, topics, consumption and digital tools used.
2. Analyze the changing roles of storytellers for news, businesses and nonprofitorganizations.
3. Increase ability to come up with big, original ideas and creatively.

Learning Outcomes

1. Develop a deeper sense of why and how we create and value stories
2. Learn about the ways digital communication technologies can expand and enhancenarrative techniques
3. Develop narrative technique and the ways digital elements can interact with traditional written narratives to change the ways an audience experiences story
4. Learn how to match narrative techniques to an audience

Contents

New Technologies, Creative Opportunities: Evolution, Digital Entertainment, Convergence (4 Lectures)
Creating Story-Rich Projects: Interactivity, Character Dialogue, Emotion (6 lectures), Social Media, Transmedia, Project creation (6 lectures)
Harnessing Digital Storytelling for Pragmatic Goals: Teaching, Advertising, Training (9 Lectures)
Media and Models: Mobile Device and Applications, Video Games (6 lectures), InteractiveCinema, Interactive TV, Electronic Kiosks, Immersive Environments (6 lectures)
Digital Storytelling Tools (5 Lectures)

Text Book

1. C.H., Miller, Digital Storytelling, A Creator's Guide to Interactive Entertainment,Focal Press, 2004

Reference Books

1. Seth Gitner, (2015), Multimedia Storytelling for Digital Communicators in a Multiplatform World, Routledge Publishers.
2. Joe Lambert (2013), Digital storytelling capturing lives, creating community, Routledge Publishers.

Course Title	**Human Factors in Interaction Design**	Course No.	**DHL7XX0**
Department	IDRP-DH	Structure (L-T-P-D[C])	3-0-0-0 [3]
Offered for	Ph.D. (Cr>=0); M.Sc. (Cr >=30); M.Tech. (Cr>=0); B.Tech. (Cr>=100)	Type	Elective
Prerequisite	None		

Objectives

1. Introduce the study of human-computer interaction and user interface design.
2. Explain theoretical understanding of the field and some practical UI design skills.

Learning Outcomes

1. Develop prototypes based on the interaction design principles.
2. Participate as usability testers in evaluating the designs of others.

Contents

Introduction: Definitions, Interaction Design Principles, Paradigms, Vision, Theory, Models, Frameworks (5 Lectures)
Introduction to human factors: Role of psychology, physiology in interaction design,Human Factors Perspective, Cognitive Aspects (5 Lectures)
Social and Emotional Interaction: Conversation, Remote Interaction, Co-presence, Expressive Interface, Emotion Design, Anthropomorphism (8 Lectures)
Interfaces: Types of Interface, natural Interface (5 Lectures), Multimodal, Wearables,Brain Computer Interface (5 Lectures)
Data Gathering and Analytics: Data Collection Techniques, Quantitative and Qualitative Analysis, Data at Scale (7 Lectures)
Evaluation Techniques: Types of Evaluation, Usability Testing, Analytics and A/B testing, Predictive Models (7 Lectures)

Text Book

1. Sharp, H, Y, Rogers, J, Preece, INTERACTION DESIGN beyond human-computerinteraction, John Wiley & Sons (2019)

Reference Books

1. Ratner, Julie (ed); Human factors and web development; Lawrence Erlbaum Associated (2003)
2. Sanders, Mark S; McCormick, Ernest J; Human factors in engineering and design,McGraw Hill (1993)
3. Zunse, Leonard; Visual perception of form; Academic Press (1990)
4. Journal of Human Computer Interaction

Title	**Selected Topics in HSS - I**	Number	HSL7XX0
Department	HSS	L-T-P [C]	1–0–0 [1]
Offered for	UG and PhD	Type	Elective
Prerequisite	None		

Objectives

The Instructor will:

1. Expose the students to the latest upcoming fields in the area of HSS

Learning Outcomes

The students are expected to have the ability to:

1. Apply the knowledge of recent topics to specific research areas in the field of HSS

Contents

The topic clouds for the course include contemporary topics in HSS and may be updated according to the instructor.

Textbook

Relevant Textbook and/or research papers to be announced by the instructor.

Self-Learning Material

Relevant Textbook and/or research papers to be announced by the instructor.

Preparatory Course Material

Relevant Textbook and/or research papers to be announced by the instructor.

Title	**Selected Topics in HSS - II**	Number	HSL7XX0
Department	HSS	L-T-P [C]	2–0–0 [2]
Offered for	UG and PhD	Type	Elective
Prerequisite	None		

Objectives

The Instructor will:

1. Expose the students to the latest upcoming fields in the area of HSS

Learning Outcomes

The students are expected to have the ability to:

1. Apply the knowledge of recent topics to specific research areas in the field of HSS

Contents

The topic clouds for the course include contemporary topics in HSS and may be updated according to the instructor.

Textbook

Relevant Textbook and/or research papers to be announced by the instructor.

Self-Learning Material

Relevant Textbook and/or research papers to be announced by the instructor.

Preparatory Course Material

Relevant Textbook and/or research papers to be announced by the instructor.

Title	**Selected Topics in HSS - III**	Number	HSL7XX0
Department	HSS	L-T-P [C]	3–0–0 [3]
Offered for	UG and PhD	Type	Elective
Prerequisite	None		

Objectives

The Instructor will:

1. Expose the students to the latest upcoming fields in the area of HSS
